Date taken / Date Recorded: 20 November, 2026
Caption / Description: FR – long version : À Bossangoa, à 300 km de Bangui, en Républiqu e Centrafricaine, 80 % des enfants malnutris cont ractent aussi le paludisme — une double menace qui réduit fortement leurs chances de survie. Cha que année, à partir de mai, les réserves alimentai res s'amenuisent alors que la saison des pluies c ommence : la prolifération des moustiques s'inten sifie, vecteurs du paludisme.
