

# Bits in Extensions Reference Guide

# Tilted Trivia

by SLIVER.tv

Test viewers' video game knowledge with thousands of custom trivia questions related to the game on stream. Many will enter, but only one will remain... At launch, Tilted Trivia will include support for Fortnite, League of Legends, CSGO, PUBG, Overwatch, GTA V, and Hearthstone.

# OneView

by Esports One

League of Legends esports fans can put their powers of prediction on the line. With the OneView Extension, viewers can vote on when First Blood will happen, which team will take the first Dragon, and more. Real-time prediction results, leaderboards, and persistent rank tracking means all viewers will see who knows the LoL scene best.

# Bits Voting Studio

by iPowow

The perfect way to help out (or maybe troll...) your favorite streamer. Poll is built to let viewers guide what the streamer does next. Which weapon should they buy? Which map should they choose? Now it's up to you.

INTRODUCING

# Bits Voting Studio

Create Polls Customize Your Look Gain Bits

## Engage Your Audience with Bits Voting

# Bithead Arcade

by Daborog Games

We almost resurrected the Yo Dawg meme for this one. Sometimes, when you're watching a game, you just need to play a game yourself. Bit Arcade lets you play arcade-inspired classics, right on stream, and compete with other viewers for a high score.

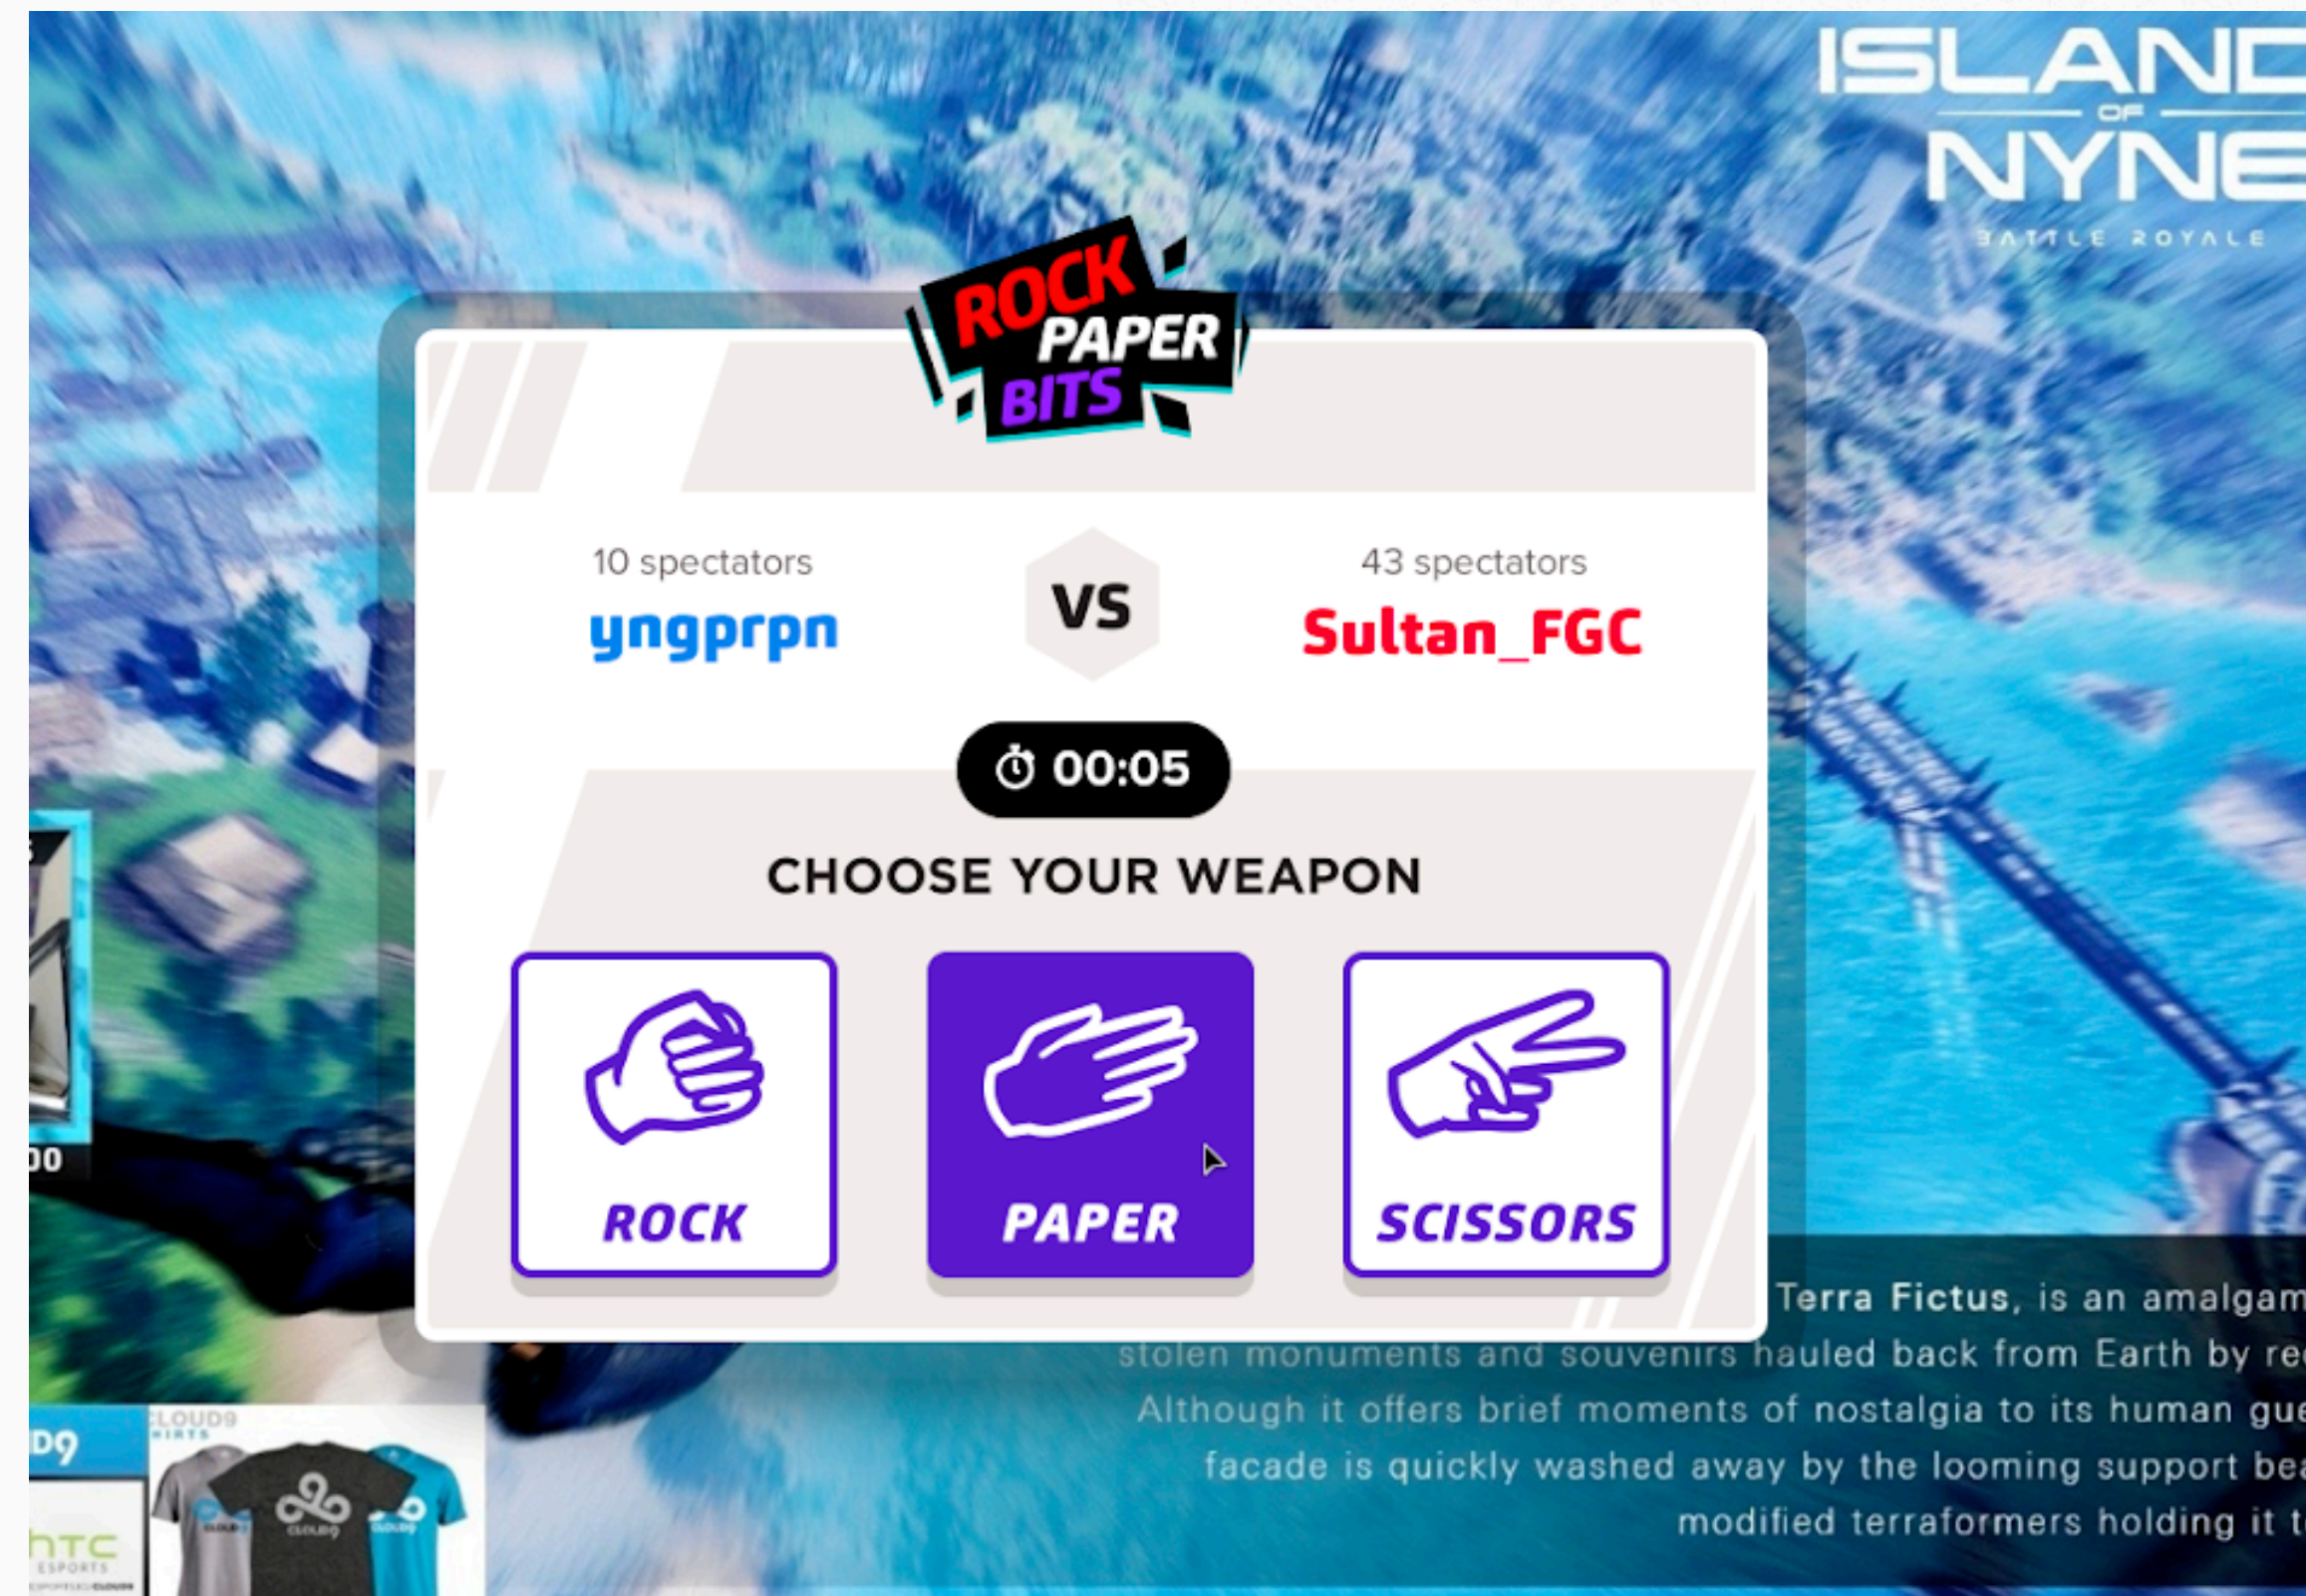

# Rock Paper BITS!

by Maestro

No need to mess with the classics. With Rock Paper Bits, streamers can start an impromptu Rock Paper Scissors tournament. Once you're in, it's a hand-to-hand battle down to the last person standing.

# BOBMOB

by vAudience

Build your own fully customizable avatar and have it dance, throw food at the screen, and more. BOBMOB partners will be able to upload their own custom accessories, so viewers can rep their favorite creators no matter which channel they're on.
