

UK fuel prices report

Petrol and diesel price changes in February 2017

Our view on prices

"The agreement between OPEC and non-member countries seems to be holding firm for the time being which is not good news for motorists. For prices at the pumps to come down again we would need the oil price to reduce and the pound to make up some of its lost ground on the dollar.

"Given the global oil production situation and a weaker pound all we can really hope for at the moment is some continued price stability."

— Simon Williams, RAC fuel spokesman

Crude oil

Price of a barrel of oil **fell**
\$1.59 to \$54.26

Unleaded

Wholesale price **fell 1p** to
113.01p per litre
