AIRSTUDIO MUSE

Less setup. When inspiration hits, just create.

Built for musicians and content creators,
a portable all-in-one recording system。
One device combining professional sound capture, wireless monitoring and a recording workflow.

Power on. Press REC.
Record directly on AirStudio Muse.

No need to connect a phone or open an app first. Capture melodies, vocals and performances, then take your material into HISONG Link or a DAW to finish your work.

64GB

Built-in storage
Keep your ideas on the device

Wireless monitoring

ZeroSync™
Ultra-low latency as you sing or record

DualTrack

Onboard two-track recording
Flexibility for editing later

LESS GEAR. FEWER STEPS. MORE CREATING.

WHAT MAKES AIRSTUDIO MUSE DIFFERENT

Ready to record when inspiration hits.

AirStudio Muse is more than a compact recorder. It brings together AirStudio's microphone, wireless monitoring and audio interface, plus standalone onboard recording, so you can start without waiting for a phone or software.

01 / FLASHCAPTURE™

Press REC. Start recording.

Power on, select a pickup mode, and press the physical REC button to start onboard recording. Press it again to stop and save.

Idea strikes | Press REC | Saved onboard

64GB

Storage without a phone

Save song ideas, rehearsals, spontaneous vocals and thoughts on the go.

Onboard DualTrack™

RECORD NOW · EDIT LATER

MIC — Independent mic track

BACKING TRACK — Backing track (instrument + backing combined)

Record two tracks directly on AirStudio Muse without opening an app: an independent vocal track (MIC) and a backing track. Recording backing audio requires a connected external source, such as a phone. Instrument and backing audio are combined into one backing track, not saved separately.

Record first. Refine later. Export your vocal and backing material after recording, then continue editing, mixing and refining your work in a DAW or supported HISONG Link workflow.

AIRSTUDIO AT ITS CORE

Your recording workflow, in one AirStudio.

From sound capture and real-time monitoring to recording with phones and computers, AirStudio Muse delivers the core capabilities of the AirStudio system.

01 / LISTEN

ZeroSync™ Wireless Monitoring

Earbuds store and charge inside the device, offering ultra-low-latency wireless monitoring so you can hear yourself as you sing, play or record.

Monitor even when not recording

02 / HEAR CLEARLY

VocalSense™ 2.0

Optimizes vocal pickup for real-world mobile recording, reducing environmental interference while preserving natural tone and vocal detail.

For singing, vocals, spoken content and more

03 / PICKUP

Dual-Mode Microphone

Switch between Condenser and Enhanced Dynamic pickup modes to suit your environment and sound source.

Choose the right pickup for the moment

04 / CONNECT

USB-C Audio Interface & Wireless Output

Connect to compatible phones and computers via USB-C. The included wireless receiver sends audio to compatible USB-C devices for recording or live streaming.

Connect with DAWs and mobile video

05 / REAL-TIME FX

Real-Time FX Processing

Enable preset vocal effects with one tap. In HISONG Link, further adjust reverb, noise reduction, EQ, compressor and limiter while you record and monitor.

Controls vary by mode and connection

From AirStudio to your creative workflow

AirStudio
Onboard recording → USB Drive Mode
Export files → Computer / DAW
Edit & produce

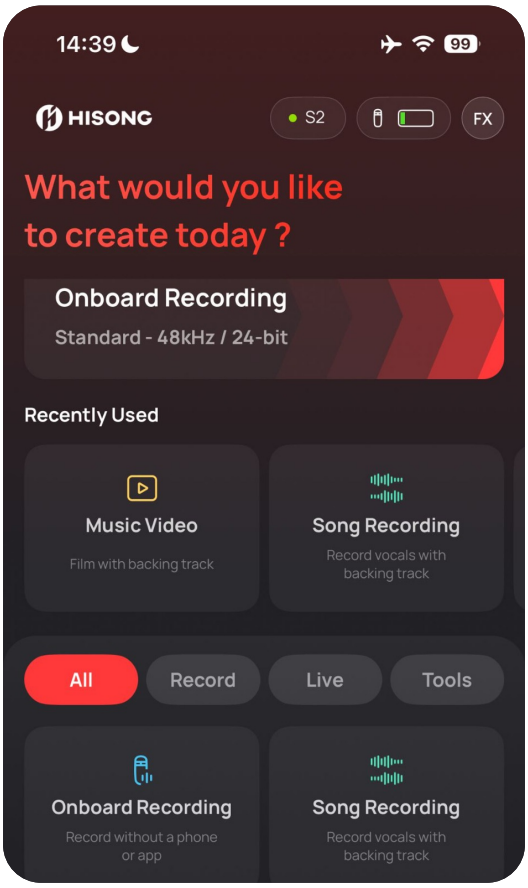

Connected workflows: record and adjust sound via USB-C in HISONG Link or other compatible software. The number of App MultiTrack tracks depends on the connected devices and inputs.

CREATION STARTS WITH YOUR GOAL

One AirStudio + HISONG Link. Many ways to create.

HISONG Link — One App. Endless Ways to Create.

From vocals and instruments to music videos, streaming and post-production, HISONG Link organizes tools around what you want to create. Choose your goal first, then enter the relevant recording and sound-control workflow, without navigating complex settings.

Choose what to create and get started

01 / SONG RECORDING

Song Recording

Record vocals with a backing track using the supported track workflow.

02 / MUSIC VIDEO

Music Video

Capture audio through AirStudio as you film a music video.

03 / INSTRUMENT RECORDING

Instruments & Guitar + Vocal

Capture instrumental performances and vocal-plus-instrument ideas.

04 / PODCAST & INTERVIEW

Podcast & Interview

For spoken-word recordings, interviews and content creation.

05 / LIVE STREAMING

Live Streaming & Performance

Real-time sound control with compatible platforms and connections.

06 / MULTITRACK & DAW

Multitrack & DAW

Record and edit through compatible connections, then continue in a DAW.

Start with what you want to create, not how to set up your gear.

Start with your creative goal, not your gear settings.

HISONG Link supports quick access through task-based entry points, recently used tools and device status. Track counts and functions depend on connection type, device, software version and accessories. AI-driven automatic personalization is not claimed here.

TECHNICAL FACTS

Specifications & What’s Included

The portable all-in-one system, down to the specifications.

Pickup modes	**Condenser / Enhanced Dynamic**
Microphone frequency response	**20Hz–20kHz**
Microphone sensitivity	**Typical −41 dB**
Total harmonic distortion	**THD < 1%**
Signal-to-noise ratio	**SNR 72dB**
Max. sound pressure level	**137dB SPL**
Built-in storage	**64GB**
Default recording format	**24-bit / 48kHz**
Maximum recording format	**32-bit / 96kHz***
Wireless monitoring	**ZeroSync™ Wireless Monitoring**
Earbud driver	**13 mm dynamic driver**
Compatible systems	**iOS / Android / Windows / macOS**
File access	**USB Drive Mode**

In the Box

- AirStudio Muse device
- Included USB-C wireless receiver
- Windscreen / ear hooks
- USB-C to USB-A adapter
- Carrying pouch
- 2 wireless monitoring earbuds
- Magnetic adapter
