The B170S Networked Streaming Amplifier is Now Available

The B170S Networked Streaming Stereo Amplifier by Bluesound Professional is now available across North American and global distribution markets.

TORONTO, ONTARIO, CANADA, AUGUST 02, 2022 – Bluesound Professional, the premium distributed audio ecosystem for commercial spaces, launches the B170S Networked Streaming Stereo Amplifier to North American and global distribution markets. Orders for the B170S are open immediately with warehouse availability starting in September 2022.

The B170S is an all-in-one streaming solution for any commercial music installation combining a high-quality stereo low impedance and constant voltage amplifier with a BluOS enabled network music player.

The low impedance output is perfect for applications where intelligibility and sophistication are important. Alternatively, multi-speaker installations like corridors or high-traffic areas can be catered to with the constant voltage option that allows for daisy-chained speakers, in turn

reducing cable lengths and complexity. With keyhole slots allowing for flexible mounting options, the B170S is well-suited to hide under shelves, tables and walls or be rack mounted into a 3U space with the racking accessory.

Continuing Bluesound Professional's multi-zone commercial music solutions, streaming services like SoundMachine, Custom Channels, SiriusXM for Business, QSiC, and Tunify and others, are natively integrated into the BluOS enabled network music player in the B170S and can be controlled with the BluOS Controller app on PC, Mac, iOS and Android.

Key features of the B170S Networked Streaming Speaker:

- A complete stereo solution for commercial installations
- Integration with local network content storage
- Low impedance and constant voltage outputs options:
 - 2x80W into 4/8 Ω
 - or 2x100W into 70V
 - or 1x100W into 100V
- Operates on the BluOS platform allowing flexible, unlimited grouping of zones
- Integration with many streaming services including SoundMachine, Qsic, Tunify, Custom Channels and SiriusXM for Business
- 6W standby mode
- Flexible mounting options including mounting of 6 x B170S in a 3U rack space using the optional RM160 rack mounting shelf
- Secure network preventing unauthorized control
- Third-party control options compatible with PC, Mac, iOS and Android

ABOUT BLUESOUND PROFESSIONAL

Bluesound Professional is a fusion of hardware and software that is purpose-built for high performance networked audio for retail shops, bars, restaurants, hotels, gyms, and other commercial applications. End users can connect and control nearly any audio source, including streaming services, internet radio, or networked hard drives, while installers can confidently specify rack-mounted hardware that integrates seamlessly with smart controllers. Powered by BluOS, an award-winning multi-zone audio management software platform, made native in a comprehensive range of controllers, streamers, amplifiers, and speakers, Bluesound Professional makes commercial audio installation projects easy to configure, deliver, and use. Bluesound Professional is a division of Lenbrook International, renowned manufacturers of premium audio technologies for residential and commercial applications.
