

## LONGINES LEGEND DIVER

L3.764.4.50.0

It is immediately recognisable by its two crowns and internal rotating bezel. The new LONGINES LEGEND DIVER is resurfacing with a 39 mm diameter, faithful to the original 1959 model from which it takes its inspiration.

Certified as a Divers' Watch with a water-resistance up to 30 bar / 300 metres, the model is driven by an exclusive Longines L888.6 calibre resistant to magnetic fields and equipped with a silicon balance-spring. This movement has a power reserve of up to 72 hours. The entire watch is chronometer-certified by COSC. The hours are marked by elongated indexes and raised luminescent Arabic numerals. The rhodium-plated and polished arrow-hands, coated with Super LumiNova®, mark the time with optimum visibility in all circumstances. The collection's symbol, a diver, is stamped on the watch's perfectly-angled screw-down case back.

This black dial model is presented on a brown leather strap with a steel tongue buckle.

L3.764.4.50.6

It is immediately recognisable by its two crowns and internal rotating bezel. The new LONGINES LEGEND DIVER is resurfacing with a 39 mm diameter, faithful to the original 1959 model from which it takes its inspiration.
