

Press release// EVOC BIKE – SPRING/SUMMER 2025

ELBOW & KNEE PROTECTION

New season, new protection – EVOC expands portfolio

Thanks to consistent further development of the LITESHIELD FLEX protector technology, years of research, and expertise in new materials, ergonomics and manufacturing technologies, EVOC is now expanding its portfolio in the area of protection. In line with the motto "Protect the things you love!", EVOC now also offers maximum protection for parts of the body that are extremely exposed when cycling. With the new ELBOW & KNEE PROTECTION, EVOC is taking the next logical step when it comes to safety and comfort.

Over the last 20 years we have travelled to more than 50 destinations – always in search of the best trails and stunning powder runs. Finding the right backpacks and bags to meet our needs in terms of functionality, protection and quality proved difficult. So, we started to produce equipment to suit our requirements. Since 2008, EVOC has stood for evolution and the design of high-quality, sports backpacks, bags and luggage – with a special focus on perfect protection. EVOC – PROTECTIVE SPORTS PACKS

PROTECTION TECHNOLOGY: LITESHIELD FLEX

EVOC's latest protector technology – LITESHIELD FLEX – enables a level of comfort and freedom of movement never before experienced. It offers outstanding safety, is airy and light, and perfectly adapts to the body in all temperatures. With its new LIMB PROTECTION, EVOC is introducing two knee protectors and an elbow protector that enable maximum impact protection and utmost comfort.

ELBOW PROTECTOR LS FLEX LITE

Lightweight, comfortable and ultra-protective – our ELBOW PROTECTOR LS FLEX LITE with Level 1 approved protection is a must-have for every bike ride. The elastic yet hard-wearing protector offers optimum padding for elbows, which are particularly exposed when cycling, both during crashes and on vigorous rides. Equipped with LITESHIELD FLEX protector technology, the protector adapts perfectly to the elbow and allows for maximum flexibility in every movement. The comfortable outer material and special structure of circular and cross elements in the protector enable excellent ventilation and maximum wearing comfort.

- Optimum ventilation thanks to breathable, flexible materials
- Comfortably soft outer material (Lycra)
- Silicone tape on sleeve ends for non-slip hold
- Extremely comfortable fit
- Abrasion-resistant and tearproof material on the elbow

KNEE PROTECTOR LS FLEX LITE

The KNEE PROTECTOR LS FLEX LITE is an ultra-light knee protector that provides highly effective padding with Level 2 approved protection and boasts impressive wearing comfort, which is largely due to the anatomic fit of the sleeve and efficient ventilation. The combination of dimensionally stable materials and a silicone finish on the sleeve end make for a perfect fit and prevent the sleeve from shifting during action. Side padding provides further protection for the knee in case of a crash and on vigorous rides.

- Optimum ventilation thanks to breathable, flexible materials
- Additional protection on the side of the knee for maximum safety
- Abrasion-resistant and tearproof outer material on the knee
- Extremely comfortable fit
- Silicone tape on the sleeve end for non-slip hold

RPP: 100€/ 100\$

KNEE PROTECTOR LS FLEX ENDURO

With its KNEE PROTECTOR LS FLEX ENDURO, EVOC is introducing a comfortable knee protector with Level 2 approved protection and individual adjustment options. The POWER FLAPS are used to tighten the protector pad on the shin, ensuring reliable hold. A neoprene knee cap ring provides relief for the knee and keeps the protector reliably in place – for lasting optimum wearing comfort. Side padding provides further protection for the knee in case of a crash and on vigorous rides. The protector also ensures efficient ventilation and features silicone tape on the sleeve end to keep it firmly fixed to the leg.

- POWER FLAPS – attached directly to the protector for perfect hold without shifting
- Adjustable strap for a secure fit
- Abrasion-resistant, tearproof material on the knee
- Cushioning Airprene material for protective comfort
- Additional side protection for the knee to ensure maximum safety
- Optimum ventilation thanks to breathable, flexible materials
- Silicone tape on the sleeve end for non-slip hold
