

Meet Sennheiser at CES 2018 and Discover our Take on the Future of Audio

We are delighted to offer a first look at the next milestone in our AMBEO 3D audio program. Join us at the Sennheiser booth to explore this forthcoming product firsthand. You will also get the chance to experience the AMBEO SMART HEADSET at CES. This intuitive, mobile binaural recording headset makes 3D audio a reality on smartphones by capturing incredibly detailed and realistic immersive recordings.

At CES, we will also unveil some exciting new headphone solutions.

We are looking forward to welcoming you in South Hall 1 at Booth 20606. Just stop by at our booth or get in touch with us to schedule a meeting:
