

Polymers for Europe Alliance announces the 2024 Polymer Producers Awards with a Special 10-Year Anniversary Celebration

The Polymers for Europe Alliance proudly announces the launch of the 2024 Polymer Producers Awards. This edition is particularly significant as it marks the 10th anniversary of the Alliance's dedication to fostering a competitive and innovative polymer industry in Europe. This year's theme, "Commitment to the European Market," highlights the importance of suppliers' investment and growth within Europe.

Voting opens on **February 20th** and will run until **May 20th**. All users of polymers in Europe are invited to participate in this essential survey, which remains confidential and free of charge.

"The Best Polymer Producers Awards were created in 2015 to re-establish a constructive dialogue and good communication between suppliers and users of polymers in Europe. We encourage plastics converters in Europe to participate and rate all their suppliers. As we celebrate the 10th anniversary, the increasing number of voters (1000) each year demonstrates the enduring success of the awards." Said **Ron Marsh**, Chair of the Polymers for Europe Alliance.

Award Criteria & Voting

This year, the Polymers for Europe Alliance will evaluate suppliers based on delivery reliability, circularity, quality, communication, and innovation, with a special emphasis on Commitment to the European Market. This includes:

- **Willingness to invest:** Assessing financial and operational investments within Europe.
- **Capacity modernization:** Evaluating upgrades and modernization of European production facilities.
- **Supply security:** Rating the ability to maintain a stable polymer supply across Europe.

The rating tool is easy to understand, extremely user-friendly, and provided in several languages to reach as many polymer users in Europe as possible.

If you have not yet established an account with the Polymers for Europe Alliance, you may register for free here: polymercomplyeurope.eu/node/210/register to gain exclusive access to the rating tool.

Upon accessing the rating tool, you will have the opportunity to select suppliers from 12 distinct polymer categories: PP, HDPE, LDPE, LLDPE, PET, PVC, PS & EPS, PC, ABS, EVA, EVOH, and Specialty Polymers. After making your selections, you will be able to evaluate these suppliers based on six key criteria: Delivery Reliability, Polymer Quality, Communication, Commitment to the European Market, Innovation, and Circularity.

10-Year Anniversary & Awards Ceremony

A special 10 Years' Achievement Award will honor a supplier demonstrating a decade of consistent excellence, determined from past winners.

Top suppliers will receive awards in various categories based on average ratings, along with a distinguished award for Commitment to the European Market covering all polymer types.

The celebratory ceremony will take place during the EuPC networking dinner of the EuPC (European Plastics Converters) Annual Meeting in Brussels, Belgium from the 12th to 13th of June 2025 in Brussels, Belgium, recognizing both annual and decade-long industry achievements.

Polymers for Europe Alliance

About Polymers for Europe Alliance

The Alliance was initiated by the European Plastics Converters association (EuPC) during its General Assembly in May 2015. It is an online, confidential information platform open to all parties who have an interest in the competitive conversion of polymers in Europe. Its objectives are to provide factual public information on the status of the polymer supply situation in Europe and to re-establish a constructive dialogue with the supply base. The initiatives of the Alliance also include the Best Polymer Producers Awards for Europe, which are now organised on an annual basis. In this Europe-wide online customers' satisfaction survey all users of polymers in Europe can rate their best suppliers of the year.

About European Plastics Converters (EuPC)

EuPC is the EU-level Trade Association, based in Brussels, representing European Plastics Converters. Plastics converters (sometimes called "Processors") are the heart of the plastics industry. They manufacture plastics semi-finished and finished products for an extremely wide range of industrial and consumer markets - the automotive electrical and electronic, packaging, construction and healthcare industries, to name but a few.
