

LONGINES PRIMALUNA

L8.126.0.71.6

Longines unveils the redesigned PrimaLuna collection, a complete reimagining that embodies the brand's philosophy that true elegance evolves while remaining fundamentally timeless.

This watch features a reimagined 34-mm stainless steel case with a bezel adorned with 58 diamonds, totaling 0,580 carat. It has a classic sunray silver dial with blue painted Roman numerals.

For the first time in PrimaLuna history, the automatic moonphase complication is joined by a practical date display, powered by Longines' exclusive L899.5 automatic calibre with silicon balance spring technology.

The crown itself becomes a poetic statement – its bubble-like form evokes the full moon while engravings of lunar crescents encircle its surface, creating a tactile connection to the celestial complication within.

This model comes with a redesigned stainless steel bracelet that features shorter, half-moon domed links.

L8.126.0.97.2

Longines unveils the redesigned PrimaLuna collection, a complete reimagining that embodies the brand's philosophy that true elegance evolves while remaining fundamentally timeless.

This watch features a reimagined 34-mm stainless steel case with a bezel adorned with 48 blue sapphires in a subtle gradation of hues and sizes, totaling 1.06 carat. The dial is crafted from a new shade of blue- known as "celestial blue"- in mother-of-pearl and is embellished with 14 diamond indexes.

For the first time in PrimaLuna history, the automatic moonphase complication is joined by a practical date display, powered by Longines' exclusive L899.5 automatic calibre with silicon balance spring technology.

The crown itself becomes a poetic statement – its bubble-like form evokes the full moon while engravings of lunar crescents encircle its surface, creating a tactile connection to the celestial complication within.

This model comes with a special pearly celestial blue leather strap.
