

Things to Know About Pixel Buds Pro 2

Pixel Buds Pro 2

01

**Better than ever,
with upgraded
audio, Gemini, and
a fresh new color.**

Pixel products are designed to get better over time. We're always working on improvements, from Pixel Drops to years of software updates across our Pixel phones, watches, and earbuds.¹

Speaking of getting better: Pixel Buds Pro 2 are getting a major upgrade. Level up your audio, enjoy new ways to interact with Gemini,² and even choose a new color that perfectly matches the new Pixel 10 phones. Best of all, these improvements will be available to all Pixel Buds Pro 2 users through a software update.

02

**A new color to
match Pixel 10
phones.**

Pixel Buds Pro 2 are now available in Moonstone – so you can get the perfect match for your new Pixel 10 phone. Enjoy a cohesive and sophisticated look, from pocket to ear.

03

**Sound that adapts
to your world.**

Adaptive Audio automatically adjusts to how noisy your environment is. It helps decrease sounds and drown out distractions in loud environments for comfortable listening, while still letting you be aware of your surroundings.³ (Coming September 2025.)

04

**Help protect your
hearing.**

Your hearing is important, and Pixel Buds Pro 2 are here to help protect it. With Loud Noise Protection, your earbuds will automatically dampen sudden loud noises to safeguard your hearing. So the blaring siren of a passing fire truck won't be passed to your ears at maximum volume.^{3,4} (Coming September 2025.)

Pixel Buds Pro 2

05

Answer texts and calls hands-free.

Now you can pick up calls and reply to texts even if your hands are full. Just nod or shake your head to accept or decline calls and reply to texts. Pixel Buds Pro 2 detect these head movements using the built-in advanced accelerometer and dedicated sensors.⁵ (Coming September 2025.)

06

Go Live with Gemini.

Users have loved interacting with Gemini on Pixel Buds Pro 2, and when you go Live, you can have Gemini connect with other apps. You can brainstorm ideas for a movie night, add a snack list to Google Keep, and schedule an event for Saturday evening in Google Calendar – all while your phone stays in your pocket.⁶

07

Talk to Gemini Live, even in noisy environments.

For clear Gemini Live interactions in various environments, Pixel Buds Pro 2 use advanced audio processing to prioritize your voice and eliminate background noise, so your conversations with Gemini Live are uninterrupted.⁷ (Coming September 2025.)

08

Stay powered up and in the know.

Now, you'll get helpful notifications when your charging case is running low on battery, or is fully charged. Plus, you can always check your battery levels right on your Pixel phone with the battery widget.

Pixel Buds Pro 2

09

Light ears ahead.

Pixel Buds Pro 2 seamlessly blend design, performance, and smarts to give you an extraordinary audio experience.

They were designed to be the most comfortable earbuds, inspiring the design of the latest Pixel Buds 2a. Getting the best fit is easy. Just use the twist-to-adjust stabilizer: twist counterclockwise for a snug fit during workouts, or clockwise for all-day comfort.

And they were the first earbuds built with the Google Tensor A1 chip. This chip brings ultralow-latency audio processing, and delivers Active Noise Cancellation that's twice as strong as our previous-generation earbuds.⁸
