When Dylan McCann (pictured) taught at Molalla Elementary School in Oregon, his fourth and fifth grade students at learned about biomimicry and created inventions with a 3D printer. He does similar activities now that he teaches at Twality Middle School in Tigard, Oregon.

Students in Maureen Foelkl's third grade class at Chapman Hill Elementary School in Salem, Oregon designed solutions to flooding and erosion with help from professionals linked to their class through Oregon Connections.

Teacher, Dylan McCann, guides his students at Twality Middle School in Tigard, Oregon through a STEM lesson and brings in industry experts to her class virtually using Nepris or for in-class visits using Oregon Connections.
