

CLINIQUE

NEW High Impact Mascara™ in Black Honey

Available as from July 2024

A mascara that effortlessly adds volume, definition and length. Our proprietary formula features a built-in primer and rich pigments that allow a seamless build- layer after layer for definition, length, and non-clumping volume.

Our iconic Black Honey shade now available as a High Impact Mascara

Buildable volume and natural lashes dialed up a notch. High Impact Mascara kicks up the volume and length of each and every lash- and resists clumping.

Rich black pigments give lashes intense color, adding to the drama. Create the look you want with this lengthening and volumizing mascara, from your-lashes-but-better to lush, bold drama.

Soft fiber brush was designed to add definition, combing and separating lashes. Lash definition draws attention to eyes.

For whom? Appropriate for sensitive eyes. Appropriate for contact lens wearers. Ophthalmologist Tested.

Also available in Black and Black/Brown

Suggested Retail Price: €32

Available as from July 2024 at Clinique.nl, De Bijenkorf, Douglas, Ici Paris XL

The story behind our High Impact Mascara™

Our most loved mascara, your loudest lash look. Clinique High Impact™ Mascara is a buildable mascara that delivers lusher, longer, bolder lashes. See 51% more volume, instantly. The soft fiber brush adds definition, combing and separating lashes.
