### Friendly Relations at InnoGames: Tribal Wars 2 releases Coop-Feature

#### Strategic Cross-Platform Game allows players to support each other in war effort

**Hamburg, September 1, 2015.** Today, online games developer [InnoGames](#) launched the new coop-Feature of its cross-platform strategy game [Tribal Wars 2](#). From now on, players are allowed to invite up to two coop-partners in order to receive help with their game account. InnoGames released a new [video](#), explaining the feature in detail. The game follows its legendary browser predecessor [Tribal Wars](#), which has 55 million registered players worldwide.

Coop enables players to have members of their tribe join their account and help them with in-game progression or maintain the account in case the owner is absent for a while. Since the invited player gains access to all ingame-aspects of the account, it is absolutely crucial to only use this feature with people the player trusts. But then the players can even work on the account at the same time through different devices.

In Tribal Wars 2, players find themselves as the leader of a small village in the midst of a medieval world. Tasked with growing and expanding their empire within a war-torn landscape, they have to fight in order to survive. The MMO's focus is real-time, strategic battles with and against other players.

With about 130 million registered players, InnoGames is one of the world's leading developers and providers of online games. Currently, the Hamburg-based company employs 350 professionals from 25 nations. InnoGames has scored major success with games such as [Tribal Wars](#), [Grepolis](#) and [Forge of Empires](#).
