

CONQUEST HERITAGE CENTRAL POWER RESERVE

L1.648.4.78.2

To mark the Conquest collection's 70th anniversary (1954-2024), Longines is revisiting one of its iconic timepieces with its new Conquest Heritage Central Power Reserve model. A striking tribute to the historic model, the power reserve indicator is revealed by two rotating discs in the centre of the dial.

The three-part champagne dial of this Conquest Heritage Power Reserve is flanked by twelve applied yellow gold-coloured hour markers. A fine circular thread separates the indexes and marks the minute track. Like the applied hour markers whose colours they adopt, the skyscraper-style hour and minute hands are coated with Super-LumiNova®. This 38 mm model is powered by the exclusive magnetism-resistant Longines L896.5 calibre.

L1.648.4.62.2

To mark the Conquest collection's 70th anniversary (1954-2024), Longines is revisiting one of its iconic timepieces with its new Conquest Heritage Central Power Reserve model. A striking tribute to the historic model, the power reserve indicator is revealed by two rotating discs in the centre of the dial.

The three-part anthracite dial of this Conquest Heritage Power Reserve is flanked by twelve applied rose gold-coloured hour markers. A fine circular thread separates the indexes and marks the minute track. Like the applied hour markers whose colours they adopt, the skyscraper-style hour and minute hands are coated with Super-LumiNova®. This 38 mm model is powered by the exclusive magnetism-resistant Longines L896.5 calibre.
