RANGE ROVER SPORT

LEADING BY EXAMPLE

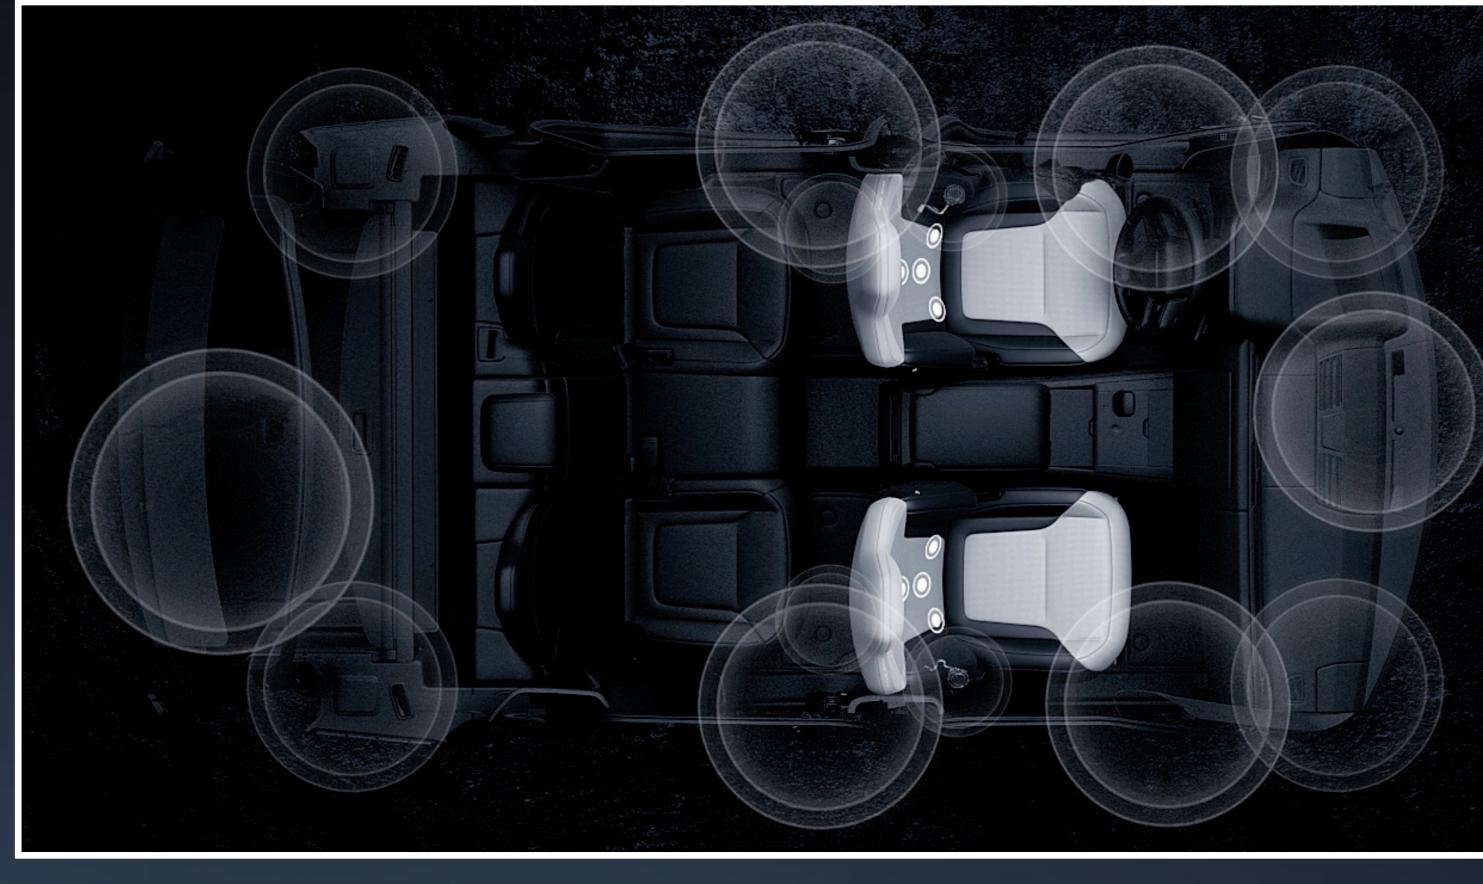

New Range Rover Sport SV is the first production vehicle to incorporate a tactile audio system from industry leader **SUBPAC**TM - technology used by the world's top recording artists and composers.

FEEL THE SOUND

Incorporating SUBPACTM Al optimising software and four transducers, each Body and Soul Seat generates precise synchronised vibrations to create the most engaging and immersive in-car audio experience.

SURROUND SOUND

Body and Soul Seat works with New Range Rover Sport SV's **29-speaker**, **1430W, Meridian Signature** Sound System, with each front SV Performance Seat incorporating two speakers.

ADVANCED WELLBEING

Six Wellness tracks designed in collaboration with Coventry University can help enhance mental and physiological wellbeing, influencing heart rate variability to reduce anxiety or improve cognitive response.

GLOW
