Degroof Petercam signs agreement with Objectway to implement Eximius Portfolio Management to strengthen its digital offering for the benefit of its Asset Services third party clients

Brussels, 15 December 2021 - Degroof Petercam, a leading independent investment house, and Objectway, a global top 100 wealth, banking & asset management software provider, have signed an agreement to implement Objectway's Eximius Portfolio Management. The solution will complement the group's Digital offering for the benefit of its Asset Services third party clients.

Belgium- headquartered Degroof Petercam is a reference financial institution in Europe, combining private banking, institutional asset management, investment banking and asset services. Degroof Petercam Luxembourg selected Eximius Portfolio Management after a competitive tender. Key arguments in favour of the solution were its compatibility with local regulations and the full coverage of all required digital functionality for third party asset managers.

With this new development, Objectway strengthens its position in the Benelux region as trustworthy provider of reliable solutions in the Wealth Management space.

"There is a lot of traction and interest in the market for sophisticated and innovative solutions to deliver performance through a holistic closed-loop portfolio management process and a perfect investment strategy execution. We are absolutely delighted that Objectway has been selected by Degroof Petercam as the trusted partner," said **Kurt Vanhee, Managing Director Continental Europe and North America at Objectway**.

"As a client-centric institution, we permanently update our tools and processes to better serve our clients. The Eximius solution is designed to support the Group's growth ambition and its digital strategy in the Asset Services business and in particular the third-party client segment", said **Sylvie Huret, CEO of Degroof Petercam Asset Services**.
