Decorating with greenery around windows adds a cosy, homey feeling to any room, and DAKSJUS hanging planters are perfect for the task. If you are afraid you might water your computer along with the plants hanging above your desk, opt for our evergreens that only require a little dusting now and then.

PH196620.JPG **New** DAKSJUS self-watering plant pot 22,99 505.670.95

Give your plants the gift of a happy and healthy life with this DAKSJUS self-watering plant pot. Made from a porous terracotta that holds excess water, it lets your green friends draw moisture whenever they need it. Refilling it is a breeze, thanks to a handy gap on the side.

Place DAKSJUS vases on a windowsill and watch the sunlight give life to your plants, seeds, and the vases themselves. Designed to help your plants grow strong and healthy, they will lift your mood with every sprout.

*“We hope the vases will entice you to grow new things, and that you will feel joy when your seeds come to life.”*

Designers **Wiebke Braasch & Iina Vuorivirta**

*“Loving plants while having limited space can be a challenge. That is why we created the DAKSJUS plant stand, so you can maximise your plant collection vertically. The compact size and angled legs take up little room, and the round shape of the legs creates a soft look that complements the natural beauty of plants. And it’s simple to move since it’s made of sturdy, lightweight bamboo. This plant stand is like a blank canvas – ready for your creativity and beloved plants!”*

Designers **Wiebke Braasch, Luna Gil & Anna-Maria Nilsson**

Bring more life into your home by getting some new, green roommates. This DAKSJUS plant stand in bamboo saves floor space and makes it easy to decorate with plants almost anywhere.

*“The goal was to create a set of small plant pots that would allow people to bring greenery into any room, even on a small surface. With the four DAKSJUS plant pots, you can grow seeds and display flowers, succulents or herbs. We hope they inspire you to fill your home with plants, colour, and joy.”*

Designers **Wiebke Braasch, Luna Gil & Anna-Maria Nilsson**

These tiny DAKSJUS plant pots are perfect for displaying baby plants, cacti, and succulents. With their mixed colours and relief pattern, they are just as decorative on their own as they are together.

PH196817.JPG **New** DAKSJUS potting mat 2,50 305.673.03

If the hassle of cleaning up is robbing you of the joys of being a plant parent, this DAKSJUS potting mat may be the solution. Handy press studs on the corners help contain soil, tools, pots, cuttings and seeds, making it possible to plant and groom without creating a mess. To clean up, just wipe, rinse off and fold it flat until your next potting project.

Get ready to witness magic in your kitchen! The DAKSJUS sprouting dish is made from porous red clay that keeps the dish evenly damp, while its powder-coated exterior makes it waterproof. In short, it's the perfect pot for growing nutritious sprouts.
