Vorwerk VR200 Robot Vacuum cleaner

Price: £749

Buy from: <https://kobold.vorwerk.co.uk/robot/>

Equally at home in uber modern apartments and country cottages, the VR200 uses 60-degree laser navigation to scan the room 1,800 times per second, creates a precise map and memorise it.

A handy schedule function means you can set the VR200 to clean your home while you're out at work, and the neat climb assist feature makes it easy to overcome obstacles of up to 2cm.

A 90 minute battery life means it can clean up to 120sqm on a single charge.

Features:

Room cleaning

The Kobold VR200 vacuums every room lane by lane, thanks to its unique room navigation. If its battery needs to be charged, it independently navigates to the base station. It then continues vacuuming from the point where stopped.

Spot cleaning

Besides room cleaning, you can also use the VR200 to vacuum in specific areas: Spot cleaning reliably and thoroughly vacuums an area of about 1.5 x 1.2 m – based on the same principle as room cleaning.

Schedule function

The schedule function lets you easily define start and finish times for your Kobold VR200 so that it can vacuum when you are not home. It can even be individually pre-programmed for every day of the week.

Eco-option

The Eco-Option allows the Kobold VR200 to vacuum even more quietly and it achieves an even longer operating time of up to 90 minutes with one battery charge.

Technical data

SAFETY MARK	CE mark
HOUSING	High-quality, recyclable, thermoformed plastic
MOTOR	Maintenance-free DC motors
FAN	Single-stage fan
VOLTAGE/ POWER SUPPLY UNIT	00 - 240 volts AC 50/60 Hertz
WEIGHT	Approx. 5 kg (not including accessories)
NOISE LEVEL	67 dBA (measured on carpet under free field conditions)
BATTERY PACK	Li-Ion 14.4 V; approx.; 84 Wh, nominal
