

Introducing Amopé™ Pedi Perfect Electronic Foot File Reveal beautifully smooth feet in *Just One Use*

Amopé™ Pedi Perfect Electronic Foot File is designed to treat rough, dry, cracked feet quickly and effortlessly – no soaking required. The gentle yet fast-rotating Micralumina™ roller head safely and easily buffs away hard skin, for perfectly smooth feet in **just one use**, giving women the confidence of healthy looking feet, so they can **love every step**.

The specially designed roller head is equipped with a large curved surface area, which contours to the shape of the foot allowing for removal of dead skin on the heels and toes. The ergonomically shaped Soft Touch handle provides ease of use for hard to reach areas.

The Amopé™ Pedi Perfect Electronic Foot File is designed for multiple uses. Unlike other paper-based electronic foot files, the durable Micralumina™ material can be washed or rinsed to clear away built up residue, while prolonging the life of the roller head without causing the surface to be worn down.

Created with safety in mind, the Amopé™ Pedi Perfect roller head does not have any sharp edges or blades. If too much pressure is applied, the built-in safety feature immediately stops the roller head to ensure gentle skin removal.

Perfectly smooth feet in just 6 steps:

1. Remove the protective roller guard before use.
2. Ensure that the roller head is securely inserted into the unit. Do not use without the roller head attached.
3. Turn on the unit by twisting the silver ring to the left and gently glide the roller head in regular passes over the affected area, applying light to medium pressure for no longer than 3 to 4 seconds in one spot. For optimal results, feet should be clean and dry.
4. Continue with regular passes until the hard skin is removed and your feet feel smooth and soft again. Use in successive sessions until your feet feel soft and are free from dry skin. Every so often, turn off to check the results. Repeat the process as needed.
5. When you are finished wipe your feet with a damp cloth to remove any excess dead skin and thoroughly dry feet.
6. Finish by applying a foot moisturizer.

Kit Contents:
