EVOC BACKPACKS - SPRING/SUMMER 2022

HYDRO PRO: Professional water dispenser for your ride

The extra-lightweight hybrid between smart hydration backpack and perfectly ventilated vest ensures ideal water supply on stage or enduro races, as well as your after-work lap. The vest was specifically designed for high-performance cycling applications and is available in two different volumes (1.5 l and 3 l).

Ample energy and specifically liquid intake are vital for your success on events in intense heat and on dusty surfaces. Simultaneously every smidgen of weight can become a burden and good ventilation on your back is extremely valuable. The short-contoured HYDRO PRO offers all the essential properties of a hydration backpack for ambitious biking. The quick-access back compartment allows space for a 1.5 litre hydration bladder and smaller items and valuables. It is also equipped with two 150 ml mesh pockets on the chest strap to ensure energy bars or gels remain within easy reach throughout. This also makes them big enough for mini flasks that are used in trail running. The zippered pockets underneath let you stow away mini tools or your mobile phone. The lateral AIRO FLEX sections give the pack a tight, yet comfortable fit and prevent any unwanted movement on your back. The short cut of the back section enables easy access to your jersey pockets anytime.

In the last 20 years, we have travelled to more than 50 destinations – always in search of the best trails and most amazing powder runs. Finding the right backpacks and bags that met our requirements in terms of functionality, protection and quality was difficult. So, we started developing equipment according to our personal preferences. Since 2008, EVOC has stood for evolution and the concept of high-quality, sporty backpacks, bags and luggage – with a particular focus on proper protection. EVOC – PROTECTIVE SPORTS PACKS
