

Majority of Users Trust Inherent Security of Mobile Operating Systems – Germans More Skeptical than British

Cortado Mobile Solutions asked business users and IT managers in the UK and Germany about their views on mobile work

(BERLIN/DENVER, December 14, 2015) Cortado Mobile Solutions, provider of the enterprise mobility solution Cortado Corporate Server, asked in July 2015 a total of 215 business users and IT managers in Germany and UK about their experiences with mobile work. The results show the levels of confidence in mobile operating systems in addition to cultural differences between the countries and the increasing demands placed on enterprise mobility.

Some of the results:

- All of the users were of the opinion that Google's Android and Apple's iOS are the most advanced operating systems.
- More than half of the users (52%) place more trust in the operating system they use than a security solution of a third-party provider.
- Android and iOS users (around 60%) believe that their relevant operating system is significantly more technically mature than Windows Phone users (32%).
- None of the respondents believes that BlackBerry is a leading operating system.
- In the United Kingdom, Android users are more impressed by Android than Apple users are by iOS.
- In Germany however, Apple users are more impressed by iOS than Android users are by Android.
- In Germany (41%), the level of trust placed in the security of the operating system is lower than in the United Kingdom (61%).
- In relation to security, significantly more users generally swear by the iOS operating system than they do by the Android operating system.
- The demands placed on an enterprise mobility solution have increased: access to the internal file server is the top productivity function for 65.6% of the respondents; printing, a function that not many people would immediately think of, is still considered to be an important feature by one in three of the respondents.

Cortado Mobile Solutions

Cortado Mobile Solutions GmbH is a wholly owned subsidiary of Cortado Holding AG, and is responsible for all operations relating to the enterprise mobility solution Cortado Corporate Server. The unique enterprise mobility solution offers the perfect balance between security for the organization, easy manageability for the IT department and maximum flexibility for users.

The on-premises software includes all the tools required for successful enterprise mobility; mobile device management, mobile application management and mobile content management, and can be fully integrated into the Windows backend. IT administrators continue to work with their known systems, Active Directory groups and Windows privileges, and users can access network drives, SharePoint and intranet pages directly from their mobile devices.

Cortado Mobile Solutions follows the philosophy that working natively delivers the highest levels of user acceptance. So Cortado's enterprise mobility solution fully supports native app management and instead of focusing on separate storage when it comes to file sharing, enables a direct connection to the corporate network. The result is a significant increase in productivity for mobile employees, improved collaboration among teams as well as convenient management for the IT department. Cortado's enterprise mobility solution is developed and tested at its headquarters in Berlin, Germany. Also experts in offices in the United States, UK, Australia, Japan, and Brazil, highly-qualified consultants at our Berlin location as well as a trained, worldwide network of channel partners provide presence and support to local customers throughout the world.
