

WELCOME TO
BUSINESS.

flydubai

READY FOR **BUSINESS.**

Experience more.

We're dedicated to providing choice, flexibility and a better travel experience for all our customers. With our Business Class service, flydubai offers an even more comfortable and personal flying experience; one that delivers the business and leisure traveller alike ready to make the most of any opportunity their destination has to offer.

AT THE AIRPORT.

On departure.

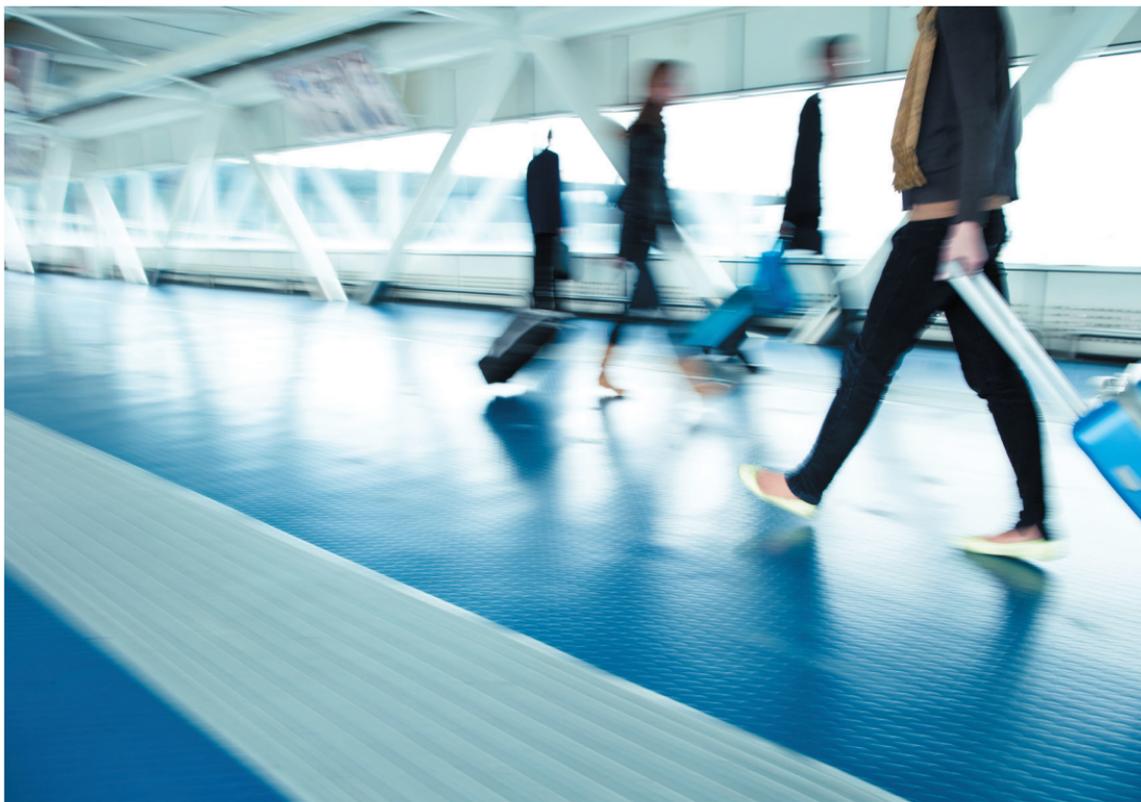

Our Business Class passengers can make the most of their time by spending less of it at the airport; priority services on the ground at selected airports across our network provide a speedy path through check-in and security.

And now at Dubai International Terminal 2 the dedicated business boarding gate, and bus to take you to the aircraft, will ease your departure.

In the lounge.

Once through immigration, Business Class passengers can relax in our dedicated lounge in Terminal 2 at Dubai International, or at the airport lounges across most of our network. They can catch up with their emails using the free WiFi, whilst enjoying a coffee and pastry, or even have a meal before their flight. And when it's time to board, they'll enjoy priority boarding too.

On arrival.

After a comfortable and relaxing flight, on arrival in Dubai, a dedicated bus takes our Business Class passengers straight from the aircraft to arrivals where they'll be fast-tracked through immigration.

And at most destinations, priority baggage collection means our Business Class passengers are soon out of the airport and on their way.

TIME TO RELAX.

Take a seat.

Our Business Class seats are exceptionally comfortable and spacious. With built-in lumbar support, generous recline and extendable leg-rests, they provide the perfect opportunity to relax.

Made in soft Italian leather, with a seat pitch of 42 inches, the 12 Business Class seats in our Business Class cabin provide the perfect environment to work, rest or catch a movie.

Passengers can sit back and enjoy one of more than 290 movies on their personal 12.1-inch touchscreen TV or plug in a laptop to their seat's individual power supply and get down to work.

INSIDE THE CABIN.

Boeing Sky Interior.

The cabin interior on board our ultra-modern fleet of Boeing 737s offers everything you would expect from a state-of-the-art passenger aircraft.

Every detail matters; the lighting system – with mood settings – is cleverly designed to help prevent jet lag, while the design of the overhead lockers maximises headroom to create a real sense of space.

This is an environment where passengers can work in comfort or enjoy some serious relaxation.

HD ENTERTAINMENT.

Be entertained.

Every Business Class seat has a built-in touchscreen TV, providing access to award-winning in-flight entertainment. From blockbuster movies to popular TV shows, there are more than 1,500 hours of entertainment available.

DINING ON BOARD.

Be indulged.

On flights over 90 minutes, Business Class passengers can choose a delicious hot meal from an internationally-inspired menu. To finish, dessert is served and followed by coffee.

A lighter bite.

On shorter flights, lighter cold meals are served. There are also sweet and savoury snacks available on demand throughout the flight.

DEDICATED SERVICE.

All smiles on board.

Our passengers in business enjoy a personal, professional and friendly service from a member of crew dedicated to the Business Class cabin. There's no request too large or small; whatever's needed, they'll take care of it, so every passenger arrives at their destination feeling relaxed and refreshed.

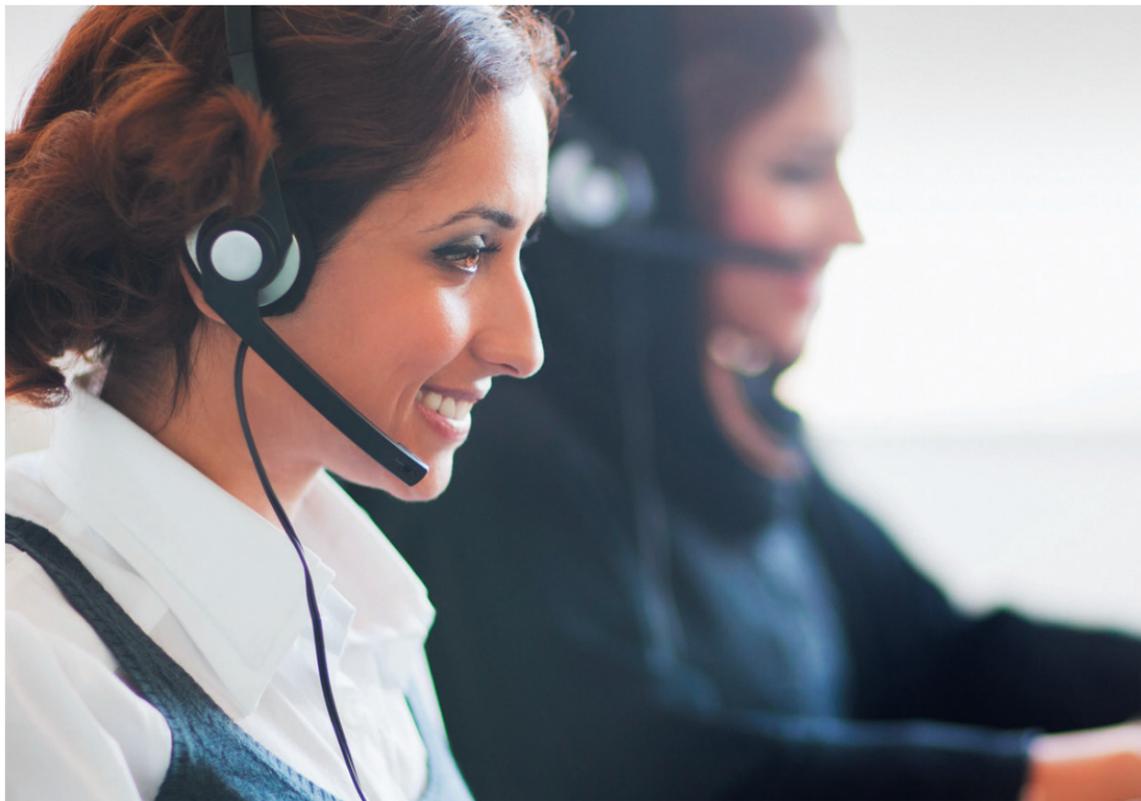

DEDICATED SUPPORT.

There to help.

From the moment a Business Class seat is booked, a dedicated support team is available by phone and email, as well as at the airport, 24 hours a day, seven days a week. Whether a passenger wants to amend their booking, choose their meal or even know what movies are showing, the Business Team is ready to help.

A member of the team can even check-in passengers before they arrive at the airport, so they can drop off their checked baggage (three pieces weighing up to 40 kilos) and be on their way.

Ultimately, the Business Team is there to ensure the travel experience for our Business Class passengers is seamless from start to finish.

BUSINESS ROUTES.

We've rolled out Business Class to the majority of the destinations on our network, including some that have never before offered Business Class air travel. Find out more at flydubai.com
