AVer and Sennheiser Partner to Deliver Smarter Camera Tracking

New integration between Sennheiser's EW-DX and the AVer MT300(N) enhances audio-triggered camera control, delivering faster, more secure, and more reliable switching for hybrid meeting and learning spaces

Wedemark, Germany 6 January 2026 — Sennheiser, the first choice for advanced audio technology that makes collaboration and learning easier, today announced that its EW-DX microphone system, the newest addition to the Evolution Wireless Digital family, now integrates with the AVer MT300(N) Matrix Tracking Box via Sennheiser Sound Control Protocol v2 (SSCv2), enabling intelligent, audio-triggered camera switching across single and multi-camera setups.

With full SSCv2 compatibility, the latest MT300(N) firmware supports encrypted communication and faster, more responsive control signals from EW-DX wireless microphone systems. This enables quick, consistent camera switching based on active audio signals, making the solution well suited to wireless microphone workflows in professional collaboration and education environments.

This simple firmware update enhances responsiveness, security, and reliability, helping ensure the active speaker is clearly seen and heard while keeping system design straightforward. This integration builds on the established collaboration between Sennheiser and AVer, which also includes support for Sennheiser TeamConnect Ceiling microphones with AVer camera tracking solutions, offering flexible options across wireless and ceiling-based audio workflows.

Key benefits of the new integration include:
- Smarter audio-triggered camera switching
    - Fast, reliable single and multi-camera switching driven by SSCv2 voice position data from EW-DX wireless microphones.
- Enhanced security and reliability
    - Encrypted SSCv2 communication supports dependable audio-video integration for professional environments.
- Designed for wireless microphone workflows

o   EW-DX integration extends intelligent camera control to wireless deployments, supporting streamlined professional meeting and learning spaces.

About the Sennheiser Brand – 80 Years of Building the Future of Audio

We live and breathe audio. We are driven by the passion to create audio solutions that make a difference. This passion has taken us from the world's greatest stages to the quietest listening rooms – and made Sennheiser the name behind audio that doesn't just sound good: It feels true. In 2025, the Sennheiser brand celebrates its 80th anniversary. Since 1945, we stand for building the future of audio and bringing remarkable sound experiences to our customers.

While professional audio solutions such as microphones, meeting solutions, streaming technologies and monitoring systems are part of the business of Sennheiser electronic SE & Co. KG, the business with consumer devices such as headphones, soundbars and speech-enhanced hearables is operated by Sonova Holding AG under the license of Sennheiser.
