Gaming headset with studio sound: beyerdynamic releases the new MMX 300 PRO

Heilbronn, 2nd July 2024 – The Heilbronn-based audio specialist beyerdynamic presents the third generation of the popular gaming headset: the new MMX 300 PRO. Manufactured in Germany, the latest development features the latest driver technology, a high-quality condenser microphone and improved comfort.

Studio DNA for an immersive gaming experience

At the heart of the closed gaming headset is the STELLAR.45 driver, which is also used in beyerdynamic's studio headphones. This ensures the exceptional audio fidelity and spatial sound reproduction of the MMX 300 PRO. Compared to the previous model, the bass and treble profiles have been thoroughly refined. Acoustic in-game events can be pinpointed immediately. The MMX 300 PRO is also impressive when it comes to music playback.

The integrated condenser microphone provides a competitive edge thanks to high speech intelligibility. The new fontanelle recess and the tried-and-tested velour ear pads offer unbeatable comfort for long gaming sessions. As with its predecessors, the new gaming headset is made in Germany using high-quality materials, making it ideal for everyday gaming fun and challenging eSports tournaments.

Powerful on PC and console

Thanks to the low-impedance STELLAR.45 driver with 48 ohms, it can be easily used on various devices including PC, Playstation, Xbox and Nintendo Switch. The included Y adaptor enables use on consoles.

Made in Germany – convincing quality

Made in Germany, the MMX 300 PRO embodies the highest quality standards. Nothing is left to chance: manufactured by hand, each gaming headset undergoes rigorous quality control before it reaches the customer. The drive system is manufactured within tight tolerances and measured several times during production. Thanks to durable materials including metal and high-quality plastics, all MMX 300 PRO headsets are long-lasting companions for demanding gamers.

“The MMX 300 PRO is a headset that not only offers the best sound, but also meets the demanding needs of today's gamers in terms of comfort

and workmanship,” explains Andreas Rapp, beyerdynamic Managing Director. “We are convinced that this headset will be a long-lasting companion for ambitious gamers.”

Individual design for individual gamers

The innovative online configuration platform MANUFAKTUR enables gamers to customise their MMX 300 PRO as desired, choosing ear pads, decorative rings or an image of their choice to add to the earcups. MANUFAKTUR also offers the option of having the headphone forks personalised with a laser engraving – ideal for gamers and streamers looking to present themselves as a brand.

Availability and price

The MMX 300 PRO is now available at a recommended retail price of EUR 299.00 (including VAT) in the online shop at www.beyerdynamic.de, on Amazon and in specialist stores. Replacement parts and ear cushions are also available for order.
