

CONTROL YOUR SOUND EXPERIENCE FROM YOUR WRIST

Sennheiser's Smart Control app now available for Apple Watch

***Wedemark, December 14, 2020* – The new Sennheiser Smart Control app for the Apple Watch is now ready for download from the App Store. A winning combination with Sennheiser's true wireless headphones, it allows listeners to control their sound experience from their wrist.**

Whether working out, on the move or at home, Sennheiser's new Smart Control app for the Apple Watch now allows listeners to control their MOMENTUM True Wireless 2, MOMENTUM True Wireless and CX 400BT True Wireless sound experience from their wrist. Depending on the features of the connected earphones, users can let the self-adjusting mode in the Watch app automatically set noise control – Active Noise Cancelling and Transparent Hearing - for when they are walking, running or just sitting and enjoying their audio. The app also allows for manual adjustment of the noise control settings.

Being on the move, listeners can leave their iPhone at home and simply connect their true wireless headphones directly to their Apple Watch to listen to their pre-stored music while controlling their sound settings from the watch.

Also featuring a low-battery warning to remind listeners to charge their headphones when the battery level drops below 20%, as well as an equalizer preset selection, Sennheiser's new Smart Control app for Apple Watch is now available. Users can find it in the Apple Watch app on their iPhone after downloading the recent update for the Smart Control app in the Apple App Store.

ABOUT SENNHEISER

Founded in 1945, Sennheiser is celebrating its 75th anniversary this year. Shaping the future of audio and creating unique sound experiences for customers – this aim unites Sennheiser employees and partners worldwide. The independent family company, which is managed in the third generation by Dr. Andreas Sennheiser and Daniel Sennheiser, is today one of the world's leading manufacturers of headphones, loudspeakers, microphones and wireless transmission systems. In 2019, the Sennheiser Group generated turnover totaling €756.7 million.
