

Schmidbauer at Breakbulk Europe 2022 International heavy-load scene meets in Rotterdam

After a two-year break due to Corona, Breakbulk Europe, the world's largest trade fair in the heavy lift and project cargo sector, will make its comeback in Rotterdam from May 17 to 19, 2022. Schmidbauer, as Germany's leading supplier of mobile cranes and special transports, will of course be there.

Gräfelfing/Rotterdam, May 17, 2022. Schmidbauer will be present at Breakbulk Europe 2022 with its own booth at the Rotterdam Ahoy Convention Center. After the long period of limited contacts with customers and business partners, this year's event is *the* international kick-off of industry meetings to interact again in person with colleagues and partners in the heavy-duty/breakbulk scene.

Schmidbauer, an international heavyweight

At Breakbulk Europe, the industry's big players will showcase their products, services, and solutions for transporting general cargo that cannot be transported in containers due to volume constraints. In addition to extensive networking opportunities, the heavy-haul-tradeshow features a dynamic conference, as well as a series of educational opportunities and workshops with more than 50 speakers and industry experts.

As a consistent, reliable partner for exceptional heavy-lift projects, Schmidbauer is excited to be back live with Breakbulk in the newly resurgent tradeshow environment to meet with solid partners and make new business connections. Because in the new year we are also looking forward to extraordinary record-breaking operations, such as most recently with the spectacular reactor transport for BAYERNOIL, in which new records were broken throughout Germany with 600 and 660 tons, respectively.

Visit us at the Ahoy Convention Center in hall 1, booth 1C20.

Here's to an exciting and successful trade fair, just like in the old days!

Company profile:

Schmidbauer is the leading provider in Germany for mobile crane services and special transports of all sizes with the performance plus – a full-service concept that combines state-of-the-art technology with sophisticated engineering and human expertise. Founded in 1932, the traditional company serves many industries as an innovative partner for lifting and moving heavy loads: from the construction, energy and chemical industries to plant and mechanical engineering. The Schmidbauer Group, headquartered in Gräfelfing near Munich, employs around 600 people and provides a large fleet of special vehicles at over 20 locations nationwide through its subsidiary Fricke-Schmidbauer Schwerlast GmbH, and is also represented internationally with branches and sales offices in Estonia, Finland, and France.
