Xylem expands cold and hot beverage dispensing solutions with Flojet's BevJet 5000

Xylem, a global water technology leader, is introducing the new Flojet BevJet 5000 Series, a highly efficient, compact bag-in-box beverage dispense system at BrauBeviale 2016, 8-10 November in Nuremberg, Germany.

The new [Flojet BevJet 5000 Series](#) is an electric bag-in-box pump designed for dispensing wine, juice, teas and liquor with alcohol content below 15 percent. The small-scale solution enables mounting in tight spaces such as cabinets, carts, or under counter situations. Its low noise level makes it unnoticeable to patrons, and the quick, simple and safe installation results in cost, time and energy savings for both installers and owners.

"Restaurant and bar operators are always looking for new solutions for preserving the quality and flavour of their product. Bag-in-box beverages stay fresh weeks after opening, while reducing costs related to packaging, shipping and storing," said Peter Wright, Market Segment Director, Residential and Specialty at Xylem. And he added: "Our BevJet 5000 Series offers a superior taste experience, and saves valuable counter space at the same time."

The Flojet BevJet5000 can be retrofitted into existing operations, ensuring easy conversion to a bag-in-box beverage system. A built-in shutoff automatically turns the pump off when a beverage bag is empty, and restarts when a full bag is connected. Additional benefits of the BevJet5000 include a quick disconnect port to replace the hose in seconds for reduced downtime, the ability to run dry without damage and self-priming capabilities.

Flojet, a Xylem brand, and an industry leader in beverage dispense, offers a full range of customizable beverage technologies for applications like beer and soft drink chilling, carbonation, remote bottled water systems and the dispensing of coffee and tea, including solutions for water supply, filtration and water boosting.

The Flojet BevJet 5000 will be on display at Xylem's booth (6-131), during the 2016 BrauBeviale exhibition in Nuremberg, Germany (November 8-10, 2016), along with many other Xylem solutions for the beverage industry.

About Xylem

Xylem (XYL) is a leading global water technology provider, enabling customers to transport, treat, test and efficiently use water in public utility, residential and commercial building services, industrial and agricultural settings. The company does business in more than 150 countries through a number of market-leading product brands, and its people bring broad applications expertise with a strong focus on finding local solutions to the world's most challenging water and wastewater problems. Xylem is headquartered in Rye Brook, New York, with 2015 revenues of \$3.7 billion and approximately 12,500 employees worldwide. Xylem was named to the Dow Jones Sustainability Index for the last four years for advancing sustainable business practices and solutions worldwide and the Company has satisfied the requirements to be a constituent of the FTSE4Good Index Series each year since 2013.

The name Xylem is derived from classical Greek and is the tissue that transports water in plants, highlighting the engineering efficiency of our water-centric business by linking it with the best water transportation of all — that which occurs in nature.
