## TOM FORD SOLEIL NEIGE COLLECTION

The ethereal radiance of winter sun on pristine white snow inspires Tom Ford's newest Soleil collection. The glistening glow and crisp air of alpine slopes is translated into winter color and fragrance. Conjuring the après-ski serenity of sun on snow, Eye Color Quads gleam with chrome shadows, while Lash Rays Mascara defines eyes with a stone fox stare. Three shade waves of Glow Sticks pop, flush and illuminate anywhere you want to add a strobe of light. A new Lip Balm formula in five sheer shades hydrates winter lips with nutrient-rich shine. Winter 2019 also premieres the first platinum shade of Shimmering Body Oil in the cool, crystalline scent of new Private Blend Soleil Neige.

## TOM FORD SOLEIL NEIGE COLLECTION

"Soleil Neige is the bright side of Soleil, a polar expression to Soleil Blanc's solar floral. Radiant with winter light, the scent mimics the shimmer of sun on snow." – TOM FORD

Tom Ford Soleil traverses from Courchevel to Megève, inspiring the exotic escape of Soleil Neige. The new Private Blend, alive with radiance and light-reflective ethereality, mimics the serene shimmer of sun on freshly powdered slopes.

The bright opening notes of bergamot and carrot seed evoke the cool reflection of the winter sun as it transforms everything in sight to a blanket of glacial white. A floral heart captures the effect of an iridescent sky, blooming with pale petal shades of ivory and rose. Fresh green notes of jasmine grandiflorum, addictive orange flower, and the fragrance of white floral Karmaflor blend white blooms with the rich warmth of Turkish rose. The scent's drydown melts onto skin with the wood and honey undertones of cistus labdanum and skin-gripping musk, as the resinous dimension of benzoin and creamy vanilla notes provide sun-kissed warmth at the finish.
