

10ZiG and ThinPrint enter into technology partnership for high-performance printing with virtual desktops

An integrated ThinPrint Client and the ThinPrint Hub provide high-performance printing for 10ZiG Thin Clients in VDI & server-based computing environments – with or without a print server

(BERLIN/DENVER, November 6, 2018) 10ZiG Technology – a world leader in Thin and Zero Client endpoints for desktop virtualization, and ThinPrint, provider of the world's leading print management software of the same name, have entered into an OEM partnership. As part of the cooperation, the ThinPrint Client has been integrated into 10ZiG Thin Clients for fast, high-performance printing. 10ZiG Zero Clients can also print plug and play securely and quickly with the ThinPrint Hub, even when using a print server.

The use of Thin Clients and Zero Clients has invaluable benefits for companies with Citrix, VMware, Parallels and Microsoft RDS environments. However, using print servers is difficult because they are often not able to send the data directly to the Thin and Zero Clients. Thanks to the integration of the ThinPrint Client, 10ZiG Thin Clients can now – even when using a print server – use ThinPrint functions for print data compression, tracking, and encryption. With the ThinPrint Hub's plug and play capability, fast and secure zero-client printing to network printers is guaranteed. Print data can be transmitted compressed to the printer via a separate, encrypted secure tunnel. The management of the print infrastructure takes place centrally in a console.

“We are delighted to have renowned VDI endpoint manufacturer 10ZiG on board,” said Thorsten Hesse, CPO of ThinPrint GmbH. “10ZiG devices are an excellent fit with our philosophy of making productive work as easy and convenient as possible for IT admins and users. 10ZiG Thin and Zero Clients, as well as the ThinPrint Hub, can be started up with plug and play even by laypeople and then remotely managed by the experts in a convenient, centralized console. This opens up enormous optimization and savings potential.”

“Printing is still part of our customers' daily work. This partnership with ThinPrint enables our customers to make both their network and their printing infrastructure efficient, high-performance, and cost-effective, leading to an even more complete end-to-end VDI solution” said Kevin Greenway, CTO of 10ZiG Technology.

A list of 10ZiG clients with integrated ThinPrint Client is available at:

About ThinPrint

ThinPrint, with nearly 20 years of continuous development and internationally patented ThinPrint technology, is the leading provider of print management software and services for businesses. Whether printing from traditional PCs, mobile devices, thin clients, virtual desktops, or from the cloud, over 25,000 companies across all industries and of all sizes optimize their printing infrastructure and increase productivity thanks to ThinPrint. In addition, more than 100, and growing, Desktop-as-a-Service, and Software-as-a-Service providers deliver reliable, high-performance printing from the cloud to their customers all due to ThinPrint. The investment in ThinPrint leads to a fast ROI because the easy-to-implement and manage print system reduces the burden on IT departments, results in significant performance improvements to the network while ensuring optimal, reliable print support at every workplace. ThinPrint technologies and components enable its use in almost any infrastructure and take into account integration of branch and home offices as well as mobile employees. The solutions are developed and rigorously tested at ThinPrint's headquarters in Berlin – software Made in Germany. Offices in the United States, the UK, Australia, Japan and Brazil, as well as more than 350 channel partners around the world offer direct and on-site customer care. Thanks to numerous OEM partnerships, ThinPrint technology components are integrated in a variety of terminals, print boxes and thin client of leading hardware manufacturers. Special significance is placed on the strategic partnerships of the company with Citrix Systems, Fujitsu, Fuji Xerox, Hewlett-Packard, Konica Minolta, Kyocera Mita, Lexmark, Microsoft, OKI, Samsung and VMware.

About 10ZiG Technology®

10ZiG Technology is a world-market leader in Thin Client & Zero Client endpoint devices for Virtual Desktop Infrastructure. 10ZiG provides leading Intel and AMD based Dual and Quad Core Thin Clients and Zero Clients for Citrix (HDX, HDX Premium, HDX 3D Pro), VMware PCoIP & Blast Extreme, and Microsoft environments, as well as the widest range of Teradici PCoIP Zero Clients on the market. 10ZiG offers free, no-obligation demo devices, Technical Support teams based in the U.S. and U.K., and provides "The 10ZiG Manager" endpoint management console with cloud capabilities completely free with unlimited user licenses supported.
