New ThinPrint Client Delivers Secure, Compressed and Fast Printing with HP FutureSmart Ready Devices

BERLIN/DENVER, February 22, 2017 -- ThinPrint**, provider of the world's leading print management software, has developed a new ThinPrint Client. Within the framework of the** HP JetAdvantage Partner Program**, the new client was developed for HP FutureSmart Ready printers. The free client delivers end-to-end encryption right to the printer and ensures compression and streaming of print data. The client optimally helps deliver secure and rapid printouts.**

More than 25,000 companies in a range of industries and sizes use ThinPrint software to optimize their printing processes. In order to benefit from the full spectrum of ThinPrint's solution including simplified administration, print data compression, bandwidth control and SSL secure print data transmission, a free ThinPrint Client is required on the client side. This can be provided, for example, via hardware in the form of the ThinPrint Hub or on desktops.

ThinPrint and HP Inc. now offer users of the HP FutureSmart series a particularly smooth printing experience. Within the framework of the HP JetAdvantage Alliance, the printing experts developed a client, available to download for free at https://www.thinprint.com/en/resources-support/software/clients/. This client is installed directly on the printers. It allows printing features such as compression, streaming, bandwidth control, and SSL encryption to be used. Companies also benefit from automated set-up and management of their printers thanks to this new client.

"ThinPrint has been an HP Partner for more than nine years," said Thorsten Hesse, CPO at ThinPrint. "For the benefit of our common customers, and for potential new customers, we have once again strengthened our close cooperation. There is now a wide range of HP printers for which a certified ThinPrint Client is available. In addition, there is a wide range of HP thin clients that are offered with an integrated ThinPrint Client."

Additional details are available in the manual at http://download.cortado.com/docu/ThinPrint/WebHelp/en/10.6FR1/ThinPrint_docu/ThinPrint_Client_for_HP_Printers/Printer_Requirements.htm

ThinPrint

ThinPrint, with more than 15 years of continuous development and internationally patented ThinPrint technology, is the leading provider of print management software and services for businesses. Whether printing from traditional PCs, mobile devices, thin clients, virtual desktops, or from the cloud, over 25,000 companies across all industries and of all sizes optimize their printing infrastructure and increase productivity thanks to ThinPrint. In addition, more than 100, and growing, Desktop-as-a-Service, and Software-as-a-Service providers deliver reliable, high-performance printing from the cloud to their customers all due to ThinPrint. The investment in ThinPrint leads to a fast ROI because the easy-to-implement and manage print system reduces the burden on IT departments, results in significant performance improvements to the network while ensuring optimal, reliable print support at every workplace. ThinPrint technologies and components enable its use in almost any infrastructure and take into account integration of branch and home offices as well as mobile employees. The solutions are developed and rigorously tested at ThinPrint's headquarters in Berlin – software Made in Germany. Offices in the United States, the UK, Australia, Japan and Brazil, as well as more than 350 channel partners around the world offer direct and on-site customer care. Thanks to numerous OEM partnerships, ThinPrint technology components are integrated in a variety of terminals, print boxes and thin client of leading hardware manufacturers. Special significance is placed on the strategic partnerships of the company with Citrix Systems, Fujitsu, Fuji Xerox, Hewlett-Packard, IGEL, Konica Minolta, Kyocera Mita, Lexmark, Microsoft, OKI, Samsung, VMware, and Wyse.
