

OSDS-48-03V(EBW)
SEMI LOW LOADER WITH WHEEL WELLS

Gets you there.

TRANSPORTING HIGH AND HEAVY WHEELLOADERS & DUMPERS ON A SEMI LOW LOADER

DEADWEIGHT
8.700KG

PAYLOAD
39 TONNES AT 80KM/H

FOR DIVISIBLE AND
INDIVISIBLE LOADS

WHEEL WELLS
400MM DEEP

WHEEL WELL
WITH SLOPE OF 35°

OPTIMAL
MANOEUVRABILITY

FLEXIBILITY
THAT GETS
YOU THERE

Nooteboom introduces the OSDS-48-03V(EBW): a new extendible lightweight semi low loader with wheel wells. By applying a new concept of this semi low loader with 4750 mm extendable loading floor, a very low deadweight of only 8.700 kg has been achieved offering up to 39 tonnes payload at 80 km/h. Due to the deep asymmetric shape of the wheel wells with 35° slope of this semi low loader, larger types of wheel loaders and dumpers can be transported, where previously this was only possible with a low loader. In addition, this semi low loader is multifunctional, such as for the transport of divisible loads, containers and tracked construction machines.
