

We are a Connected Healthcare & Intelligent Data Platform company, empowering the world's Seniors to live longer, healthier and happier, at home.

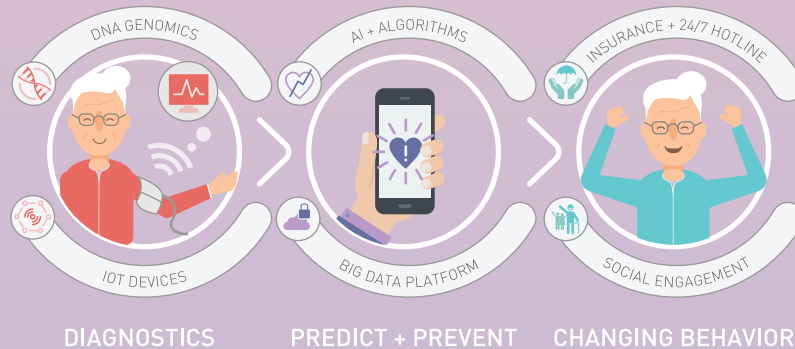

CRITICAL ISSUES

In 2015 there were **208M Seniors in China (60+)**, a **shortage of 10M professional Senior Caregivers** and **95% of the +65Y old Seniors do not have private insurance**, while 60% of Seniors live alone. In China, Healthcare costs unlike many Western countries are paid 90% by the family, 7% government and 3% by nursing homes.

The **global market for Senior care services is growing at a CAGR of 7%** and is expected to reach **more than USD 1B by the year 2022**. Growth estimates for the global long-term and **Senior home healthcare technology markets is even higher at a CAGR 18%** for 2013-2020, and was valued at approx. USD 6B in 2016.

HINOUNOU'S SOLUTION

An **IoT based Connected Healthcare Service**, **DNA genomic testing & AI enhanced Companion Robot** for daily health and biomarker monitoring, early risk identification and proactive advice on lifestyle changes, all in the comfort of one's own home.

Access to no-underwriting accident and death insurance and a 24/7 tele-consultation hotline to medical professionals, in partnership with AXA and PingAn.

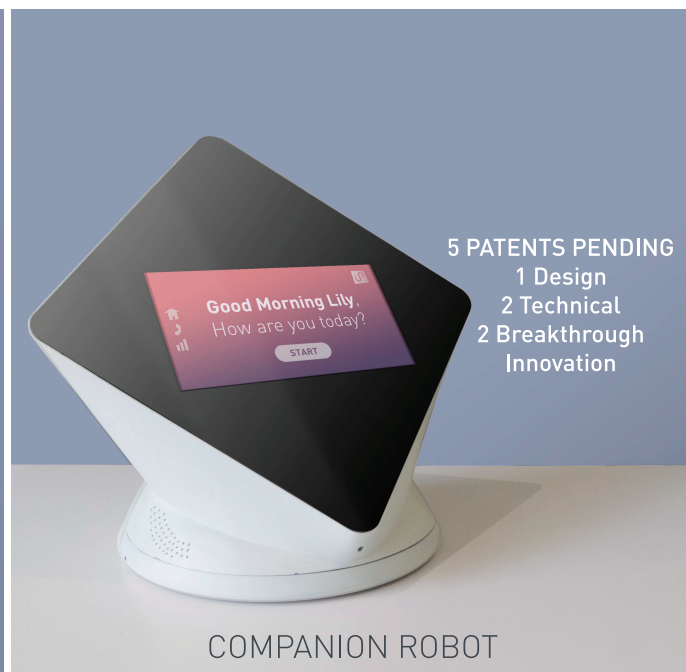

An **intelligent Data Platform** that securely facilitates the storing and sharing of the Seniors' health data via blockchain.

NouNou Loyalty Points Program and the **HiNouNou Healthcare Ecosystem** actively **engage Seniors with the broader society**, and create incentives to keep Seniors healthy with regular use of the Connected Medical Devices.
