

ŠKODA CONNECT APP

The fourth-generation OCTAVIA ushers in the following new mobile online services:

- › **Local Traffic Warning**, which informs the driver, during a journey, of any traffic problems and dangers on the road
- › **Remote Ventilation**, which enables users to turn on the interior air conditioning ahead of a trip via a mobile app
- › **Online System Updates**, which facilitates online updates for infotainment software and other software components
- › **Online Personalisation**, which allows multiple users to save or call up their personal settings in the car by synchronising with their ŠKODA ID personal account online

VOICE CONTROL – LAURA

Laura is a hybrid voice control system, enabling voice instructions to be made intuitively. The fourth-generation OCTAVIA comes with innovations such as advanced media control, voice-activated tile and menu navigation, voice-enabled web apps, and voice-controlled car functions.
