

SENNHEISER AT INTEGRATE 2019

Delivering the ultimate virtual meeting experience with TeamConnect Ceiling 2

Melbourne, 26 August 2019 - At Integrate, taking place from 27-29 August at the Melbourne Convention and Exhibition Centre, Sennheiser will showcase products from its business and education solutions portfolio. The highlight product on display is the new TeamConnect Ceiling 2 (TCC2) microphone array, which uses its patented automatic, dynamic beamforming technology to deliver the ultimate virtual meeting experience. Sennheiser will also be demonstrating the latest version of Control Cockpit software, as well as other key products including SpeechLine Digital Wireless, evolution wireless G4, TeamConnect Wireless and MobileConnect.

Jason Grbevski, Product channel manager for Integrated Systems, will also be representing Sennheiser in the Unified Communications (UC) Program participating in two panel discussions. Firstly *'The role of Unified Communications and Collaboration spaces in Higher Education'* discussing the various solutions available and guidance on finding the right choice. Secondly the panel discussion on *'Collaboration as part of the Digital Transformation'* focusing on how the office space is now becoming a destination where people, technology and space come together. Both panel discussions will be taking place on Tuesday 27th August in room 218 at 2:30pm and 4pm respectively.

TeamConnect Ceiling 2

TeamConnect Ceiling 2, which has been shipping in Australia since May, is Sennheiser's flagship audio/video conferencing solution and employs its unique flexible beamforming technology to follow the active speaker wherever he or she moves in the room. Unlike ceiling microphones with static beamforming technology that work with predefined speaking zones, TCC2 reliably captures the speaker no matter where they are in the room. Also, there is no need to alter the set-up when the number of participants changes or when a different seating arrangement is chosen: Due to its single, flexible beam technology, TeamConnect Ceiling 2 is as versatile as you need it to be and caters to any type of meeting without further adjustments. TCC2 can be used together with existing analogue conference systems, or integrated into fully digital systems, and can also be controlled and monitored over the network. TCC2 supports Power over Ethernet (PoE), Sennheiser Control Cockpit, Dante Domain Manager and provides an open media protocol for third-party control platforms such as Crestron.

Sennheiser's TeamConnect Ceiling 2, on active display at Integrate 2019, is a conferencing solution that employs automatic, adaptive beamforming technology

Sennheiser Control Cockpit 3.1.0 now available

The audio specialist will also be demonstrating the latest version of its Sennheiser Control Cockpit software at Integrate 2019, which was made available in May. This offers an intuitive, easy way to set up and manage TeamConnect Ceiling 2 along with SpeechLine Digital Wireless systems. The powerful software is accessible in web browsers on any smartphone, tablet or notebook. It offers a continuous, global dashboard overview of all network-enabled Sennheiser devices, while greatly simplifying adjusting settings for individual or multiple devices.

In addition to various workflow improvements, highlights of version 3.1.0 include out-of-range detection for wireless microphones and the possibility to select exclusion zones for TeamConnect Ceiling 2. When activated, out-of-range activation will notify the system administrator via e-mail and/or text when a wireless microphone leaves the range of the receiver. The free software can be downloaded at www.sennheiser.com/control-cockpit-software.

Sennheiser Control Cockpit is an ideal application for controlling and monitoring company or campus-wide installations. Version 3.1.0 is available now

Wireless Microphone Solutions

Sennheiser's SpeechLine Digital Wireless is created specifically for speech applications in corporate and educational environments such as universities. This microphone line provides the highest level of speech intelligibility and concise sound quality. A completely scalable system that is perfect for company/campus-wide installations, SpeechLine Digital Wireless delivers unmatched sound quality and flexible configuration options.

The Sennheiser SpeechLine Wireless Series provides specialist tools for speech applications

Also on display will be the flexible and reliable evolution wireless 300 G4. The 300 series in particular is targeted for users in corporate, hospitality and education settings with their requirements in mind.

MobileConnect

Sennheiser will also be displaying MobileConnect, its WiFi-based system for accessible hearing. The system is ideal for applications in universities and employs a BYOD philosophy so students can connect using their own device to participate in lectures with personalized audio that ensures greater intelligibility. MobileConnect also supports applications for use in theatre, opera and musical environments.

Mobile Connect provides personalized audio – not only in education environments

TeamConnect Wireless

The audio specialist will also be demonstrating the TeamConnect Wireless, a high performing portable conference solution for up to 24 people that can be used by anyone, anywhere. The stylish portable solution is made up of four units linked by wireless DECT connections that allow the system to be set up in virtually any room or table set up. It provides unmatched ease of use, speed of set up and cutting-edge connectivity that fits seamlessly into the independent, “bring your own device” ethos of the most fast-moving and flexible of modern workplaces.

TeamConnect Wireless with the charging tray for use in more permanent meeting rooms.

Visit Sennheiser at Integrate on stand C16 to learn more about the business and education solutions on display.

**About Sennheiser**

Shaping the future of audio and creating unique sound experiences for customers – this aim unites Sennheiser employees and partners worldwide. Founded in 1945, Sennheiser is one of the world's leading manufacturers of headphones, microphones and wireless transmission systems. With 21 sales subsidiaries and long-established trading partners, the company is active in more than 50 countries and operates its own production facilities in Germany, Ireland, Romania and the USA. Since 2013, Sennheiser has been managed by Daniel Sennheiser and Dr. Andreas Sennheiser, the third generation of the family to run the company. In 2017, the Sennheiser Group generated turnover totaling €667.7 million. www.sennheiser.com
