

ImmunoScience Academy

Partnering for Education & Optimizing Treatment in ImmunoScience

A unique multidisciplinary educational program providing information on immunology and immunotherapies to help improve patient outcomes

"As the need for education on immunology is everywhere, I am personally excited to be part of this initiative and to be able to share my knowledge and experiences. Together with a group of 12 renowned medical professionals coming from all disciplines, we aim to improve care for the patient"

Prof. Coulie
Chair of the ImmunoScience Academy

Prof. Dr. Pierre Coulie
Immunologist
de Duve Institute, UCL

Supported by

Bristol-Myers Squibb

Vision

Indeed this is a complex and rapidly evolving field: the rise and increasing use of a new generation of drugs, working at the level of the body's immune system, makes it crucial for physicians to receive regular updates and to include a multidisciplinary approach of knowledge sharing, to offer the most advanced and adequate treatments, as well as the best explanation to their patients.

Immunotherapies can impact the whole body. This could raise the need for a new kind of approach where multidisciplinary education and information sharing can support an optimal patient care.

Mission

The mission of the Immunoscience Academy is to provide education and enhance multidisciplinary initiatives within the immunoscience field to help improve patient outcomes.

BMS partnership

At Bristol-Myers Squibb, we work every day to advance science for patients with serious diseases.

We believe in the power of science to address some of the most challenging diseases of our time. We have a high bar for innovation focused on areas where our medicines can truly make a difference for patients. Our focus on these unmet needs comes at an unprecedented time, where scientific breakthroughs are advancing the treatment of disease like never before.

As a consequence of the discovery, development and delivery of innovative medicines, there's a clear need for a good understanding of both scientific and clinical principles.

We believe we need to drive education. We believe that supporting the ImmunoScience Academy will add value in the field of immunoscience and its related clinical applications to improve patient outcomes.
