

## **Science Photo Library and Isopix sign distribution agreement for Belgium and Luxembourg**

### **Distribution in Belgium and Luxembourg of the leading source of science and medical images & videos**

**BRUSSELS and LONDON – 23 June, 2017** – Science Photo Library (SPL), the world's leading source of science and medicine content has signed a distribution agreement with Isopix aimed to deliver SPL's collection of scientific imagery to the Belgium and Luxembourg markets.

SPL has worked for over 35 years with a wide range of specialists from scientific communities to medical professionals, ensuring images and videos are accurate and of high quality. The curated collection features extraordinary content covering healthcare, science, technology, space, environment, natural world and history.

This agreement makes Isopix the best resource for science and medicine images and videos, enabling users to enjoy access to the SPL collection.

Both companies share the same vision of providing unique content to a broad community of business and creative professionals.

Explore the mysteries of science and access a wide range of compelling images and videos. Be inspired by the engaging content that will enhance your understanding of the fascinating world of science. Visit [isopix.be](http://isopix.be) to download stunning science and medicine content.

Simon Stone, SPL's Sales Director said: 'Science content is crucial in media, education and the creative landscape. This new agreement makes inspiring and hard to source scientific content available to diverse audiences in Belgium and Luxembourg.'

‘We are very excited to represent SPL’s world-class collection. This agreement positions Isopix as the leading agency in Belgium and Luxembourg for specialist content. The agency will successfully respond to commercial and educational clients’ – commented Paul Marnef, CEO and founder of Isopix together with the COO, Tom Gastmans.

### **About Science Photo Library:**
