

Sennheiser esittelee uuden puhemikrofonin

Yhteistyössä asiakkaiden kanssa kehitetty uusi MKE mini -mikrofoni tarjoaa puhujille ja esitelmöijille helppokäyttöisen ja vaivattoman mikrofoni-ratkaisun.

Helsinki, 1.9.2022 – Edistyksellisen, yhteistyötä ja oppimista helpottavan äänentoistoteknologian johtava valmistaja Sennheiser laajentaa kattavaa mikrofoni-valikoimaansa. Rinnusmikrofonia muistuttava uusi MKE mini on korkealaatuinen, pienikokoinen ja suuntaukseton mikrofoni, joka on vain 9 cm:n pituinen ja painaa vaivaiset 7 grammaa. Ultrakevyen muotoilunsa ansiosta MKE mini -mikrofonia on miellyttävä käyttää, minkä lisäksi se täyttää kaikki puhemikrofoneja koskevat erityisvaatimukset.

As with much of Sennheiser's innovation, the MKE mini was developed in response to direct customer feedback and requests. Users demanded a presenter mic that can be worn with any hairstyle, is unobstructive and easy to install, and provides excellent sound quality. In response, Sennheiser has made microphone setup for lectures and speeches extremely easy. All that is needed for setup is to connect the microphone to a bodypack and attach a lanyard. Additionally, the MKE mini is the perfect fit when wearing a hairstyle that doesn't allow for a head mic or an outfit that offers no possibility to clip a body pack.

With a total length of 9cm and ultra-light weight (7g), the MKE mini is convenient to wear, while meeting the special challenges of a moderator microphone.

To ensure the premium audio quality one would expect from Sennheiser, Sennheiser equipped the MKE mini with the KE 4 capsule, derived from industry standard MKE 2, which provides a warm and distortion-free signal, even at high sound pressure levels. The MKE mini also features Sennheiser's Umbrella Diaphragm™ technology, protecting the mic against sweat and other moisture.

“Our customers have often voiced struggles with headmics that don't fit well over their hair, but many also struggle with where to place a body pack and lavalier mic, if they don't have a belt or pocket to hook the belt-pack to,” commented Inesh Patel, Business Development Manager, Business Communications, Sennheiser. “Therefore, we designed the MKE mini to hang with a bodypack around the neck on a lanyard with placement right under the chin, which is ideal.”

Samantha Butler, IT & AV Support Manager at Bangor University, got the chance to test the MKE mini. “I love it. I think it's great that I don't have to try to find a place on my outfit. I can just clip it, because quite often, there's nowhere to put it.”

Introducing the Sennheiser Business Communication Microphone Guide 2022

To make it easy for customers, distributors, and integrators to learn more about Sennheiser's microphone solutions, including the new MKE mini, Sennheiser today announced the availability of the Sennheiser Business Communication Microphone Guide 2022.

By offering a microphone for any situation in the workplace or classroom, Sennheiser's goal is to make collaboration and learning easier. From the smallest meeting rooms or learning spaces to the largest educational and corporate campus installations, Sennheiser has the right microphone solution to simplify your life.

About the Sennheiser brand

We live and breathe audio. We are driven by the passion to create audio solutions that make a difference. Building the future of audio and bringing remarkable sound experiences to our customers – this is what the Sennheiser brand has represented for more than 75 years. While professional audio solutions such as microphones, meeting solutions, streaming technologies and monitoring systems are part of the business of Sennheiser electronic GmbH & Co. KG, the business with consumer devices such as headphones, soundbars and speech-enhanced hearables is operated by Sonova Holding AG under the license of Sennheiser.
