

'BEyond: Excellence in Entrepreneurship': participant information

- **CONTRACT.FIT**

Mission & vision

Making every document meaningful and actionable.

Description

We are a global SaaS company that provides tools to read and interpret any document, as a building block for compelling customer experiences and hyper-efficient processes.

- **FOODPAIRING**

Mission & vision

Our long-term mission is to become the go-to platform for creating unique, fully customizable recipes based on science to promote healthy, sustainable lives.

Description

Foodpairing is mainly known to be the world's largest creative chef network. We helps chefs to discover new flavor combinations in seconds. But behind the scenes there is data-science business. Food is the new internet. Quote Kimbal Musk. In today's context of digitization of the food chain, Foodpairing is the platform for personalized food recommendations. The intelligence gathered is monetized by offering 'consumer flavor insights' to the food industry.

- **INTIGRITI**

Mission & vision

Improving security of online systems by enabling collaboration between ethical hackers and companies

Description

intigrity is a bug bounty platform that connects companies to a community of ethical hackers, hunting for security vulnerabilities in the online production environment of these companies. Hackers only get paid in case they find unique, undetected vulnerabilities that were not known by the company before. Companies typically grow extremely fast in their security maturity.

- **NALLIAN**

Mission & vision

Making the world operate as one. One community at the time.

Description

Nallian is the first open Data Sharing Platform for Business Collaboration, helping communities of business partners to become virtually integrated high performance clusters. Already delivering results for logistic hubs with BRUcloud (airport), NxtPort (seaport), CargoStream and several other communities in the Benelux, Nallian is ready to go worldwide.

- **ONTOFORCE**

Mission & vision

Everybody is a data scientist.

Description

Ontoforce is a technology company using the force of linked data to easily discover new insights in complex and big data sets.

- **PICKIT**

Mission & vision

Giving eyes to Robots.

Description

We're a software company which productized robot vision application engineering in an easy-to-use product which we ship world-wide.

- **POM**

Mission & vision

We believe that by eliminating administrative waste we create a more efficient, prosperous and happier society.

Description

POM is a state-of-the-art invoice payment platform, which adds value to both the biller and the end-user.

- **TESSARES**

Mission & vision

Our vision: Everyone & everything shall have the best Internet experience, at any place & at any time. Our mission: improve the Internet experience.

Description

Tessares provides DSL+4G Hybrid Access, creating a 'larger pipe' to cost-effectively deliver more internet speed to customers suffering low speeds. Our software-only solution gives you the choice to run on various vendor's DSL, 4G or Hybrid CPEs.

- **XENOMATIX**

Mission & vision

To make transportation safer, more efficient and more comfortable.

Description

Game changing Solid State Lidar for the most reliable and cost-effective sensing, enabling self-driving cars.

- **ZENSOR**

Mission & vision

To be the knowledgeable companion for owners and operators in making their structures increasingly safe, efficient and sustainable. If up to us, till eternity.

Description

The smart watch for critical assets such as bridges, (offshore) wind turbines, (petro) chemical plants: collecting data from various types of dedicated sensors and translating it into advanced health dashboards using big data algorithms combined with classical physics.
