

Sennheiser and Neumann to showcase premier live sound innovations at Plasa Show 2023

Experience the newest products of Evolution Wireless Digital family from Sennheiser as well as Neumann's latest live microphones, including the Miniature Clip Mic System (MCM), and the brand-new MT 48 audio interface

Marlow, August 17, 2023. This year's leading event for live entertainment technology in the UK, the PLASA Show, will feature global audio specialist Sennheiser showcasing an array of exciting solutions that are extensively employed across the live events, film, and broadcast industries. Sennheiser's team of experts will be readily available to guide show visitors through their impressive line-up, including the renowned Digital 6000 series and the fifth generation of Evolution Wireless Systems: EW-D, EW-DX, and the newly released EW-DP. Additionally, a plethora of live sound products from Neumann will be available, featuring the latest in live microphones such as the Miniature Clip Mic System (MCM), KMS 104, and KMS 105. Showcased alongside these will be Neumann's brand-new audio interface, the MT 48, along with the newest addition to the KH speaker range, KH 120 II. Each of these offerings delivers unparalleled sound quality, reliability and flexibility.

Visitors to the booth can expect first-hand experience with Sennheiser's premium Digital 6000 Series, which has firmly established itself as a favoured choice within the realm of live events and theatre productions. Furthermore, the complete suite of Evolution Wireless Digital products - Sennheiser's UHF digital system with increased bandwidth, the highest input dynamic range and lowest latency of any digital wireless system currently available - will be on display, including the EW-D, EW-DX, and the latest EW-DP wireless microphone systems.

The Neumann booth area will undoubtedly leave PLASA Show visitors impressed. On display will be the MT 48, Neumann's first-ever audio interface. Based on Merging Technologies acclaimed Anubis audio interface, this innovative product marks a significant milestone in the company's nearly 100-year history, showcasing Neumann's expansion beyond microphones, loudspeakers, and headphones into the realm of digital interaction.

Among other innovations from Neumann is the latest addition to the KH speaker range, KH 120 II studio monitor. Building upon the success of its predecessor, KH 120 II offers improvements in all acoustic parameters for deeper bass, higher SPL capability, and increased resolution.

Other highlights of Sennheiser and Neumann's PLASA offering include an expansive selection of microphones and microphone capsules available for show attendees to view and test, offering a great opportunity to understand various usage scenarios for achieving optimal sound quality.

Last but not least, Sennheiser will also showcase Li.LAC's microphone hygiene system which provides low impact, contactless cleaning and disinfection through ultraviolet light (UV-C). Entered into this year's PLASA Awards for Innovation, the Li.Lac Microphone Disinfectant[®] achieves disinfection level of 99.99%* for surface disinfection and has been approved by the independent, accredited laboratory Opsytec Dr. Gröbel GmbH.

The team will be on hand to greet show attendees at their booth and will be conducting product demonstrations throughout the show from September 3rd to 5th.

"Whether you're a sound engineer, musician or live event professional, we look forward to engaging with fellow industry experts at our booth D6 and sharing our latest array of products and technologies with you," says Kevin Gwyther-Brown, Business Development Manager – UK Pro Audio at Sennheiser. "From Sennheiser's latest Evolution Wireless Systems to Neumann's MT 48 audio interface and highly-anticipated KH 120 II, we have something in store for every user!"

* The exact disinfection level varies with the type of virus or bacteria and with the shape and the surface of the object to be disinfected.

About the Sennheiser Group

Building the future of audio and creating unique sound experiences for our customers - this is the aspiration that unites the employees of the Sennheiser Group worldwide. The independent family-owned company Sennheiser was founded in 1945. Today, it is managed in the third generation by Dr. Andreas Sennheiser and Daniel Sennheiser and is one of the leading manufacturers in the field of professional audio technology.
