FÖRNUFTIG air purifier

Say hello to healthier air

As we spend more time indoors, the climate at home becomes an important factor for health and well-being. FÖRNUFTIG air purifier is the first product from our new product segment focusing on indoor climate. The air purifier helps to create healthier air by filtering away gases and particles. These can be pollutants, chemicals, pollen, dust and odours. Thanks to the included filters, a Hepa 12 filter that cleans away particles and a carbon filter that removes gases, FÖRNUFTIG is very efficient as it catches most things in the air. Apart from the physical aspect, it improves mental well-being too as knowing that the air you breathe is safe and clean can have a calming effect.

Settings to your preference

FÖRNUFTIG has three different settings, which also give different sound levels, the lowest one is very silent and therefore suitable when sleeping. The air purifier is simple to set-up and use, and has a textile part which makes it softly blend into the home.

PH172496 FÖRNUFTIG air purifier 49.99 White 504.619.37

PH172497 FÖRNUFTIG air purifier 49.99 Black 104.880.62

FÖRNUFTIG air purifier comes with three different settings with corresponding sound levels. On speed level three, the approximate Clean Air Delivery Rate (CADR value) is 130m³/h.

FÖRNUFTIG air purifier can be wall-mounted horizontally or vertically to free up precious floor space.
