ThinPrint Mobile Print is Citrix Ready Verified

The first managed and secure mobile printing solution for businesses verified as Citrix Ready for XenMobile

BERLIN/DENVER, June 26, 2018 - ThinPrint today announced that its ThinPrint Mobile Print has been verified as Citrix Ready®. The new ThinPrint Mobile Print is the first managed and secure mobile printing solution for businesses and complements existing unified endpoint management solutions, such as XenMobile, to deliver secure iOS and Android printing. ThinPrint Mobile Print completed a rigorous verification process to ensure compatibility with XenMobile, to provide managed and secure mobile printing on iOS and Android devices.

The Citrix Ready program helps customers identify third-party solutions that are recommended to enhance workspace, networking and cloud computing solutions from Citrix.
Customers can be confident that ThinPrint Mobile Print has successfully passed a series of tests established by Citrix and can be trusted to work effectively with XenMobile to integrate iOS and Android devices into a company's existing print infrastructure so that employees can easily access and use all current network printers.

Many companies use XenMobile to securely manage all of their devices, including tablets and smartphones. With employees so productive on their mobile devices the need to connect to traditional workflows and print a document quickly arises. ThinPrint Mobile Print software is the solution. It can be integrated into EMM or MDM systems to enable secure mobile printing with iOS and Android devices. Employees can print from iOS and Android apps on their tablets and smartphones to any existing network printer in the enterprise, regardless of which printer models from which manufacturer are in use.

For additional security, a pull-printing function included in the license can be activated as required. Printing only starts once the owner of the print job authenticates directly at the printer ensuring that printouts are protected against unauthorized access. Instant Wi-Fi printing rounds off the software's range of mobile productivity features.

"ThinPrint has been a Citrix partner for more than two decades, a strong testament to both companies' dedication to supporting the secure digital workspace," said Thorsten Hesse, CPO of ThinPrint. "The XenMobile and ThinPrint Mobile Print offering clearly demonstrates this ongoing relationship and as a Citrix Ready partner for our new Mobile Print solution, we can continue to deliver the highest quality experience for our customers."

"ThinPrint has been an ongoing Citrix Ready partner and the addition of Mobile Print to its portfolio of solutions will allow our customers greater flexibility to print from their mobile devices," said John Panagulias, director, Citrix Ready, at Citrix. "The Citrix Ready Program makes it easier for customers to select the most suitable solutions that are tested and verified to be compatible with Citrix technology."

A free demo version of ThinPrint Mobile Print is available at www.thinprint.com/mobileprint.

The apps for iPhones and iPads are available in the AppStore and for Android devices in the Google Play store.

About ThinPrint
ThinPrint, with nearly 20 years of continuous development and internationally patented ThinPrint technology, is the leading provider of print management software and services for businesses. Whether printing from traditional PCs, mobile devices, thin clients, virtual desktops, or from the cloud, over 25,000 companies across all industries and of all sizes optimize their printing infrastructure and increase productivity thanks to ThinPrint. In addition, more than 100, and growing, Desktop-as-aService, and Software-as-a-Service providers deliver reliable, high-performance printing from the cloud to their customers all due to ThinPrint. The investment in ThinPrint leads to a fast ROI because the easy-to-implement and manage print system reduces the burden on IT departments, results in significant performance improvements to the network while ensuring optimal, reliable print support at every workplace. ThinPrint technologies and components enable its use in almost any infrastructure and take into account integration of branch and home offices as well as mobile employees. The solutions are developed and rigorously tested at ThinPrint's headquarters in Berlin – software Made in Germany.
