

DIY Project Idea: *Ladybug Party Food Ideas*

Ladybug Appetizer from the Garden

This cute appetizer is made from toasted slices of a baguette that are garnished with a ladybug made of fresh slices of tomato and black olives sitting atop fresh garden pesto and basil leaves. Grow several varieties of basil to add more color to your summertime dishes. Here we've used Sweet Basil, Purple Basil, and Variegated Basil 'Pesto Perpetuo'

Ladybug Skewers from the Garden

Make edible ladybugs from fresh fruit growing in your garden. Slide a strawberry and a blackberry (red grapes or blueberries work great too) onto a barbecue skewer. Plan ahead of your party and grow Botanical Interests Cat grass in a container. Place the Ladybug skewers in the container of grass for presentation. Place the Ladybug skewers in the grass for guests.
