

VELAR

RANGE ROVER VELAR P400e

The Range Rover family is fully electrified. The Plug-In Hybrid Range Rover Velar 'P400e' offers customers an efficient and refined experience, with an extensive electric-only range and fast DC charging.

ABOVE & BEYOND

PHEV

Rapid public charging at 50kW:

0-80% IN 30 MINUTES¹

Domestic wallbox charging at 7kW:

0-80% IN 1 HOUR 40 MINUTES

Electric-only range:

53KM (33 MILES)

Ultra-low emissions:

CO₂ EMISSIONS FROM 49g/km

Fuel economy of up to:

128.4MPG (2.2L/km)

0-60mph in

5.1 SECONDS

THREE DRIVER-SELECTABLE MODES

Drivers can select between three driving modes via the lower touchscreen:

EV MODE

Runs solely on electric power using the energy stored in the battery, for quiet and refined zero-tailpipe emission journeys.

HYBRID MODE (DEFAULT)

Automatically combines petrol and electric drive to optimise efficiency and performance for longer journeys. The strategy adapts to the driving conditions and the remaining charge.

SAVE MODE

Prioritises the combustion engine as its energy source, maintaining the battery state of charge at the chosen level, for deployment at a specific point in the journey.

All emissions, fuel economy and EV-only range figures are EU-WLTP (TEL) Combined

¹ Charge time possible with 50kW & 100kW DC Rapid charger (actual charge into the vehicle will be limited to 32kW). Actual charge times may vary according to environmental conditions and available charging installation
