The flydubai experience

Wherever you're travelling to, and for whatever reason, choose flydubai; we're dedicated to providing a better travel experience whether you're flying in business or economy.

From the moment you step on board, we aim to exceed your expectations. Our cabins are bright and airy, and our seats in business and economy are innovatively-designed to optimise space and comfort.

And you can always be sure of a warm welcome; our cabin crew are friendly and well-trained and have a passion for making every flight for every passenger as enjoyable as possible.

**ECONOMY
CLASS**

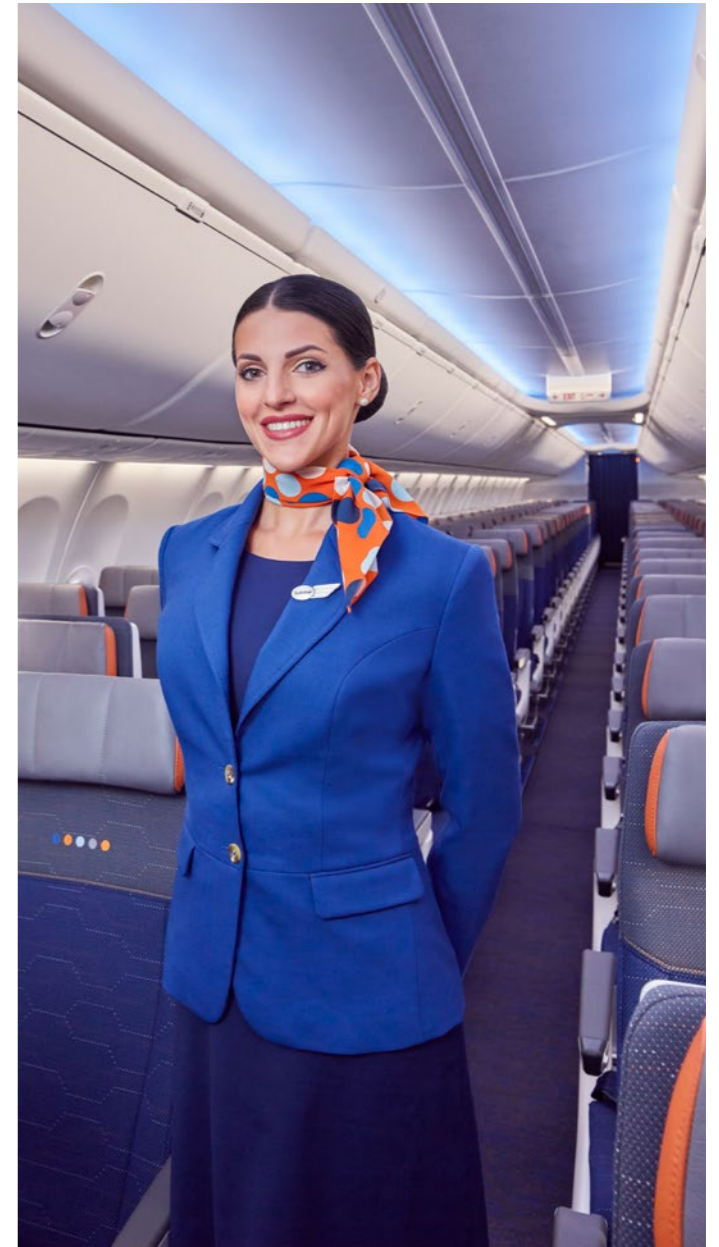

08

Economy Class

For the economy cabin of our newest aircraft, we've chosen a seat that's widely regarded as one of the most comfortable seats available today. It's designed to optimise your space and comfort, so you can sit back, relax and enjoy every flight.

Seat design to optimise your space and comfort for a relaxing flight.

Comfort on board

With gentle recline and a bottom cushion that adjusts for support and comfort, the design of the newest seat in our economy cabin is just one of the reasons the travel experience with flydubai is hard to beat.

By using premium quality materials and innovative design, we ensure your comfort is maximised for the duration of any flight. In fact, this economy seat is more commonly found on the aircraft of long-haul carriers.

The space around the seat is also optimised by clever design. There's a bi-fold table neatly tucked away into the seatback. And if you need to stow small personal items, like a tablet or a mobile phone, the dual-pocket in the seatback has plenty of room.

And because the leather headrest can be adjusted in any number of ways to give great head and neck support, it's easy to nap or doze during your flight.

Cabin interior

It's not just the design of the seats that makes the cabin feel inviting; the interior itself is an invitation to experience flight in a more relaxing way. The gently-sculpted sidewalls of the aircraft interior create a sense of spaciousness and make the cabin instantly welcoming.

The easy-to-reach overhead lockers open simply and effortlessly when it's time to stow your hand baggage. And while locker space is maximised through clever design, when closed, the lockers move back up and away to give you optimum headroom.

And throughout the flight, the cabin's innovative lighting system can be adjusted to create the right mood for every stage of the journey, whether you're having a bite to eat, watching a movie or taking a snooze.

The flydubai experience

Wherever you're travelling to, and for whatever reason, choose flydubai; we're dedicated to providing a better travel experience whether you're flying in business or economy.

From the moment you step on board, we aim to exceed your expectations. Our cabins are bright and airy, and our seats in business and economy are innovatively-designed to optimise space and comfort.

And you can always be sure of a warm welcome; our cabin crew are friendly and well-trained and have a passion for making every flight for every passenger as enjoyable as possible.

A bite to eat

If you purchase a Value economy fare or a Flex economy fare, you'll be served a light meal during your flight. And if you purchase a Lite economy fare, you can choose to pre-order a meal before you fly or select something from our buy-on-board menu.

Buy before you fly

Don't forget to pre-order all your duty-free shopping from our eShop before you fly and have it delivered to your seat when you're on board. Treat yourself or surprise someone special with the latest fragrance, an exclusive beauty-buy or something indulgent from our selection of watches and jewellery.

**BUSINESS
CLASS**

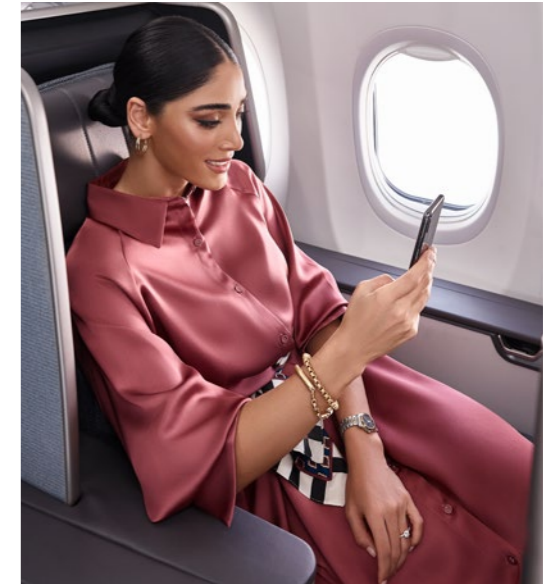

Business Class

With our business class service, we offer an even more comfortable and personal flying experience; one that delivers you ready to make the most of any opportunity your destination has to offer whether you're travelling for business or leisure.

In business, you'll enjoy a personal, professional and friendly service from a member of crew that's dedicated to the business class cabin. There's no request too large or small; whatever's needed, they'll take care of it, so you arrive at your destination feeling relaxed and refreshed.

And you'll experience one of two types of seat in our business cabin: a reclining seat or a lie-flat seat. Both provide exceptional comfort whatever the duration of your flight.

Unwind in comfort

The very best materials have been used to craft our business seats, creating the comfort of home in the air. The lushly-textured seat fabric is made using the highest quality textiles and is complemented by a soft leather headrest. And with dark fabric covering the interior seat shell, the business cabin couldn't feel cosier.

No details were overlooked when designing our business seats. Space is maximised and clutter is minimised, and there are numerous features which bring new levels of practicality to the cabin environment. For example, there's useful stowage space for small laptops, tablets and other electronic devices, which can be charged from the seat's individual USB port.

That's entertainment

When it's time to kick-back and relax, there are hours of blockbuster movies and TV shows to watch. And you can be in total control of your entertainment experience when you're on board.

Every business seat has a built-in HD touchscreen for an immersive inflight entertainment experience. Even the screen surround has been designed using low-shine materials to minimise glare and enhance your viewing enjoyment.

Dining on board

The seat's large tray table is perfect for dining. We offer delicious hot meals from our international menus on flights over 90 minutes and lighter cold meals on shorter flights. There are also sweet and savoury snacks available on demand during the flight.

Business on board

Sometimes you need to get down to business when you're on board, so our business seats have been designed with this in mind. The tray table, which remains neatly stowed when not in use, is ideal for a laptop or tablet, and with a universal power point located at the front of the seat for easy access, you can keep your devices charged throughout the flight.

**SEATING IN
BUSINESS**

Recline & relax

Our reclining business class seats are exceptionally comfortable and spacious. With generous recline and extendable leg rests, they provide the perfect opportunity for you to relax.

Made using premium quality materials and offering optimum seat pitch, our business cabins with reclining seats afford the business and leisure traveller alike the perfect environment to work, rest or catch a movie.

Our newest reclining seat has been designed to optimise your personal space and privacy. In addition to increasing the seat's space for the upper body, our design team has created a comfortable footwell for when the seat is fully reclined.

And because these new seats are set at a slight angle and staggered, your sense of personal space will be further enhanced.

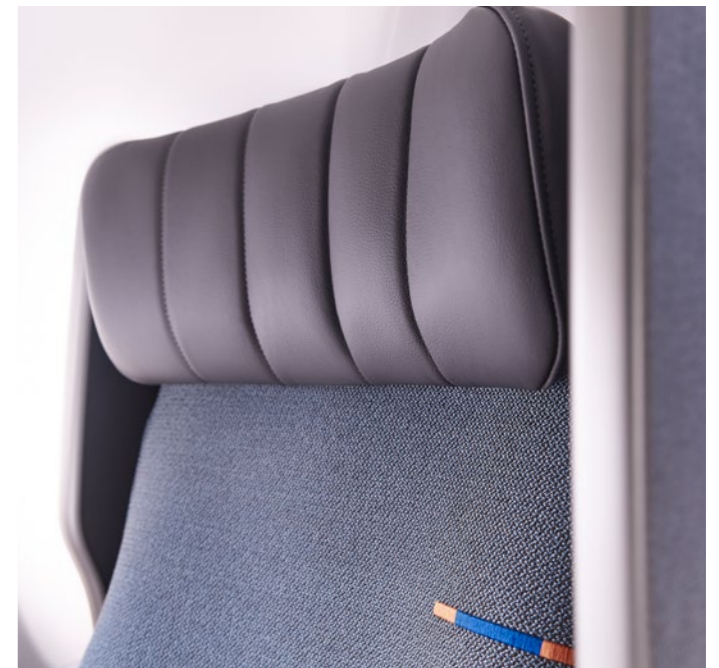

A sense of privacy

With a staggered-angled business seat, the feeling of privacy in the cabin is marked. This sense of seclusion is enhanced by the seat's fixed shell back as well as the privacy divider.

And once the seatbelt signs have been switched off, the seat is easy to control, moving seamlessly into a cradle position for ultimate relaxation. In this position, pressure on the body at key points is reduced to ensure optimum comfort throughout the flight.

What's more, the seat back and bottom, as well as the head and leg rests, are perfectly cushioned. By choosing premium quality fabrics in the design of the seat, we're delivering a best-in-class travel experience for any journey across the flydubai network.

Perfectly cushioned head and leg rests for ultimate relaxation.

Lie back & relax

Our lie-flat seat in business takes comfort on board seriously; it's been tailor-made to offer you an exceptional travel experience when travelling in business class, particularly on our longer-haul routes.

In the design of the seat, every detail has been considered. Whether you want to work on board, enjoy something to eat, catch a movie or simply get some well-earned rest, the lie-flat seat in business is packed with unique features for outstanding comfort and convenience.

You'll enjoy a spacious environment on board, as well as a sense of privacy; the high, curved shell surrounding the back of the seat helps you to feel secluded, so you can really unwind and relax during your flight.

Time for bed

With our lie-flat seat in business, you'll not only enjoy space and privacy; you can get some serious shut-eye with a fully-flat bed. If you want to get some sleep during your flight, the seat can easily be converted into a bed.

When fully reclined, the seat is totally flat and measures generously from top to toe, so even the tallest passengers can stretch out and get comfortable before dozing off. Plump pillows and soft blankets are also provided to ensure you stay snug while you sleep.

A fully-flat bed to stretch out and get some sleep.

Experience more with flydubai

The onboard experience with flydubai is designed with your flying comfort in mind, regardless of the duration of your journey and regardless of whether you're travelling in business or economy. Our commitment is to exceed your expectations on any flight to any destination across our rapidly expanding network.

So, wherever you're travelling to and for whatever reason, choose flydubai and enjoy a better travel experience.
