Water column resistance **WP 10,000 mm**  
**Breathability MVP 10,000 g/m<sup>2</sup> per 24 hours**

**K-WAY Le Vrai**, synonymous with functionality and style for over **sixty years**, undergoes a transformation in 2024 with the Le Vrai 4.0. The product is the result of an **in-depth analysis of its various components, assessed for its strengths and weaknesses**. Maintaining the **brand's essence**, the parts that continue to deliver optimal performance have been **preserved**, while those that could benefit from technological updates have been **improved**. The aim remains to offer the **best product on the market**, combining the authenticity of the brand's identifying codes with an updated and enhanced experience.

**K-Way's Claude short jacket** is an **icon** that embodies the spirit of the brand in every detail. It is made from innovative **micro ripstop 4.0 fabric, 100% recycled**, which is even more weather-resistant and breathable due to its 10K water-resistance and **10K breathability rating**, with heat-taped inner seams that guarantee excellent insulation from the wind or rain. The highlight of this **unisex model** is the **small volume** it occupies when folded and packed in one of its two pockets. Ideal to be carried in a bag or backpack, it is designed to easily withstand sudden rain or wind.

- **Waterproof, water-repellent, windproof, and breathable nylon ripstop fabric**
- **DWR (Durable Water Repellent) treatment**
- **Waterproof rating: 10,000 mm water column**
- **Breathability: 10,000 g/sqm/24h**
- **Packable**
- **Heat-taped seams**
- **Adjustable hood with drawstring**
- **Zip closure**
- **Inner windproof flap**
- **Ventilation cut-out on the back**
- **Elasticated cuffs**
- **2 zipped pockets**
- **Adjustable bottom hem with drawstring**

**Price Retail 140€**
