Whole-Body Health Benefits

Astaxanthin and vitamin C work together to promote healthy immune system function and provide powerful antioxidant support. Astaxanthin is one of the most potent antioxidant carotenoids and plays an important role in protecting cells from oxidative damage. Because it can cross the blood-brain and blood-retina barriers, it can deliver antioxidant protection to our eyes, brain, and nervous system.* Astaxanthin also supports heart and skin health. Vitamin C is a water-soluble antioxidant that helps scavenge free radicals, provides cellular protection, and regenerates other antioxidants. The synergistic blend of astaxanthin and vitamin C offers whole body health benefits and can help support a healthy balance between oxidative stress and antioxidant defense within our body.*

Carlson Kid's Immune Boost Gummies are made with Astaferm™, the most advanced, state-of-the-art, sustainable source of high-quality astaxanthin. It's the first fermented astaxanthin, derived from *Phaffia* yeast, and is fast-acting and highly absorbable. Kid's Immune Boost Gummies provide 4 mg of astaxanthin and 100 mg of vitamin C in a single gummy and come in delicious, natural cherry-flavored vegetarian, non-GMO gummies.

1 Gummy Provides	
Vitamin C (ascorbic acid)	100 mg
Astaxanthin (from <i>Phaffia rhodozyma</i> extract (Astaferm™))	4 mg
