Vorwerk VG100 Window Cleaner

Price: £249

Buy from: <https://kobold.vorwerk.co.uk/window-cleaner/>

The perfect solution for those of us that want shiny windows without the strain, the VG100 lets you clean your glass using just one hand.

Simply add water and cleaning fluid, power up the motor and glide the VG100 over up to 20sqm of glass on one 30 minute charge.

A microfibre towel removes the dirt from your window, and the motor will suck away the dirty water in an instant leaving you with perfectly clean, streak free windows.

Then, simply chuck the cloth in the washing machine and charge the battery for next time!

Features:

Easy to fill

The VG100 can be filled with water and cleaning concentrate in a flash. A full tank covers about 20 m² of glass surface. The tank consists of 2 individual chambers – the first contains fresh water and cleaning agent and the second contains the vacuumed dirty water.

Streak-free finish

A microfibre cloth makes window with the VG100 simple and streak free. The cloth does not need to be replaced during use, as the majority of the dirt is simply vacuumed away!

Afterwards, just clean the cloth in the washing machine at 60° and charge the battery ready for next time.

Lighter and easy to manoeuvre

The compact and lightweight design means you can use it with just one hand, leaving the other hand free to text or talk on the phone.

Three steps in one

The VG100 saves you heaps of time: the window is moistened, the dirt removed and the water vacuumed away in a single step.

Technical data

WEIGHT	Approx 995 g (not including charger and cleaning fluid)
DIMENSIONS	Approx 290 x 140 x 110 mm (L x W x H)
CONSUMPTION (PER USE)	Water: 80 ml Cleaning concentrate: Approx 5 ml
