EVOC PHOTO Collection 2024

The new bodyguards for photo and film equipment: EVOC introduces its new PHOTO Collection 2024!

Be it amateurs or professionals – the new EVOC PHOTO Collection is sure to delight sports and action photographers alike. Not only are these cleverly designed bags and backpacks ideal for storing and protecting photo and film equipment in on-point style while touring. EVOC – global market leader in sports backpacks with protective function – has also included numerous functional features that make transport and handling even more secure and convenient! Needless to say, the EVOC Team photographers also provided their input during the development stage of this new range.

In the last 20 years, we have travelled to more than 50 destinations – always in search of the best trails and most amazing powder runs. Finding the right backpacks and bags that met our requirements in terms of functionality, protection and quality was difficult. So, we started developing equipment according to our personal preferences. Since 2008, EVOC has stood for evolution and the concept of high-quality, sporty backpacks, bags and luggage – with a particular focus on proper protection. EVOC – PROTECTIVE SPORTS PACKS

And ... action! Sports photographers and film-makers have very particular requirements when it comes to backpacks and bags for their sensitive equipment. After all, their outdoor shoots often involve spending hours on the go, sometimes in difficult terrain, with their camera and accessories ready to use at all times.

Ample, well-padded storage space for reliable protection of photo and film equipment as well as clever, customisable interior partitioning are only two of the many must-haves. A perfect fit and maximum comfort are just as vital – through a carrying system with ergonomic shoulder straps and excellent load distribution, and a well-thought-out ventilation system that prevents overheating. Compartments for small items such as memory cards and batteries, and for personal effects are also essential, as is a laptop compartment. And of course, straps for securing the camera and attaching skis, a snowboard, snowshoes and a tripod are also important. It goes without saying that the bags and backpacks must also be able to withstand heavy-duty use.

EVOC therefore involved (professional) photographers and film-makers in the development of its PHOTO Collection 2024. The result is a range of brand-new bags and backpacks designed to meet a wide variety of photography and filming needs – with the following highlights:

A master of its trade

The **CP 40** is a lightweight, thoroughly efficient, padded 40 l backpack that is specially adapted to the needs of (sports) film-makers with large cameras. It offers more depth so that displays can remain assembled, allowing for faster and more convenient working, as well as a protection mat to prevent scratching of the displays.

As the largest version of these perfect-for-action carrying solutions in the EVOC PHOTO Collection, the CP 40 is ready to master all challenges faced by film-makers on professional assignments. The interior, with its clever 80/20 split and individually adjustable, padded EVA dividers provides plenty of storage space with added depth for equipment, plus space for personal belongings. A really handy feature is the (lockable) quick side camera access.

The ergonomic **NEUTRALITE SYSTEM** carrying system with its length- and height-adjustable **AIRO FLEX** hip belt (that can be detached if required) ensures superb load distribution, fit and air circulation, resulting in optimum comfort, especially when fully loaded during plenty of action. The water-repellent, PFC-free outer fabric is extremely tear- and abrasion-resistant. In addition, a reinforced base with rubber feet and a sturdy carrying handle make for easier all-round handling. For long and/or hot days on a shoot, the CP 40 can be equipped with a hydration bladder of up to 2 litres.

In the last 20 years, we have travelled to more than 50 destinations – always in search of the best trails and most amazing powder runs. Finding the right backpacks and bags that met our requirements in terms of functionality, protection and quality was difficult. So, we started developing equipment according to our personal preferences. Since 2008, EVOC has stood for evolution and the concept of high-quality, sporty backpacks, bags and luggage – with a particular focus on proper protection. EVOC – PROTECTIVE SPORTS PACKS

What else? The backpack also features a separate laptop compartment, organiser compartments for small items, multifunctional straps and attachment loops for securing skis, a snowboard and a tripod, as well as a built-in rain cover. Ski and snowboard film-makers out

on backcountry missions will appreciate the compartment for avalanche equipment, the signal whistle and the emergency plan. (RRP: €475, available from autumn 2023)

All-rounder and ergonomic pro

The lightweight, compact **STAGE CAPTURE 22** camera and sports backpack is the perfect companion for both professional and amateur photographers. It boasts a great fit, efficient ventilation and plenty of padded storage space for securely transporting gear. The camera

compartment can be customised by means of padded dividers and will open up completely. Or you simply access the camera from the side.

The ergonomic carrying system provides unrestricted freedom of movement and maximum comfort, with a secure fit. The **AIR FLOW CONTACT SYSTEM** ensures excellent air flow as a result of wide ventilation channels created through inward-facing EVA foam pads that reduce contact points with the back, which allows for efficient air circulation. In addition, the back panel is covered with durable, moisture-repellent **3D AIRMESH** fabric. And thanks to **BRACE LINK**, the padded, perforated and hence well-ventilated shoulder straps adapt perfectly to the wearer's shoulder width.

In the last 20 years, we have travelled to more than 50 destinations – always in search of the best trails and most amazing powder runs. Finding the right backpacks and bags that met our requirements in terms of functionality, protection and quality was difficult. Additional features include a laptop compartment, organiser compartments for small items, a compartment for a 2-litre hydration bladder, a built-in rain cover as well as multifunctional attachment loops and straps for skis, a snowboard and a tripod. The backpack boasts a water-repellent, PFC-free finish made with 50% recycled materials. (RRP: €250, available from autumn 2023)

Keep your back free and luggage to a minimum

The lightweight **HIP PACK CAPTURE 6** with a storage capacity of 6 litres comes as a well-fitting hip pack for compact system cameras plus accessories. Its core is comprised of a thickly padded main compartment with dividers that can be configured as required for safe transportation of equipment.

The **AIR FLOW CONTACT SYSTEM**, with EVA foam pads positioned inwards so as to create wide ventilation channels, ensures superior air circulation thanks to minimal surface contact. The pack also features resilient fast-drying mesh fabric that absorbs moisture and efficiently wicks away excessive heat.

Extra-wide hip wings ensure a perfect body fit. Another clever and practical feature is the **VENTI FLAP** system, which allows you to flexibly adjust the distance to your back (uphill and downhill mode).

In the last 20 years, we have travelled to more than 50 destinations – always in search of the best trails and most amazing powder runs. Finding the right backpacks and bags that met our requirements in terms of functionality, protection and quality was difficult. So, we started developing equipment according to our personal preferences. Since 2008, EVOG has stood for evolution and the concept of high-quality, sporty backpacks, bags and luggage – with a particular focus on proper protection. EVOG – PROTECTIVE SPORTS PACKS

The quick-access compartment with waterproof pocket on the inside is ideal for storing accessories, while additional spacious, zipped pockets on the length-adjustable hip belt and an elastic side pocket offer even more storage space. A tripod can be secured by means of multifunctional attachment loops, and the hip pack can also accommodate one or two water bottles. It comes with organiser compartments, backlight clip, rain cover and a PFC-free finish made with 50% recycled materials! (RRP: €130, available from autumn 2023)
