
SIG Air Handling to return to next year's ISH trade fair in Frankfurt

Zaventem, 6 December 2018 – SIG Air Handling will once again be participating in the ISH trade fair, the world's largest HVAC (Heating, Ventilation & Air Conditioning) trade fair, next year. The company will be presenting various climate-control solutions for homes, businesses, and schools.

The world's largest HVAC trade fair

The ISH trade fair is being held in Frankfurt for the second year in a row. It focuses on sustainable and responsible management of water, energy, and the indoor climate within buildings. Its size means that the trade fair is the perfect place to check out all the trends in sanitary installations and sustainable heating and air-conditioning technology. Home automation systems will also be on display.

The 2019 edition will be held from 11 to 15 March, showcasing 2,400 exhibitors, and attracting approximately **200,000 visitors**.

Solutions for homes, businesses, and schools

SIG Air Handling will be presenting various innovative climate-control systems at the trade fair. Here's a selection of their solutions.

- **30 to 50% less energy consumed by ventilation systems**

CERA is a comprehensive ventilation concept that has been specially developed for stacked residential construction. The system's strength? It lowers the energy consumed by the ventilation systems by 30 to 50% more than conventional systems. This is important because that is often around 25% of the building-related energy consumption.

- **Six different functions in a single climate-control unit**

HYBRIDAIR is a climate-control unit that combines various technologies into a single, smart design. It cools and heats, supplies air, provides lighting, and buffers sounds. The biggest advantage of this multifunctional unit is its limited size of just 85 mm.

- **Extra attention for educational environments**

SIG Air Handling also aims to create healthy indoor climates at schools because this has a **proven effect on students' ability to learn**. Cairox Ukunda HRU is an innovative, virtually silent heat-recovery appliance that creates an optimum learning environment. Thanks to the built-in sensors, it uses as little energy as possible and adapts the ventilation automatically based on the number of people present and their activities.

- **Ventilation, French-style**

The CIM EC Regulo C4 ventilation cabinet was designed especially for the French market and complies with the requirements for self-regulating ventilation and humidifying systems for

residential units. The smaller dimensions and the easy installation are paired with an energy-efficient EC motor.

Trade fair stand of 204 m² in HALL 8 – stand H68

SIG Air Handling will have a trade fair stand of 204 m² (hall 8, stand H68) at the ISH trade fair. Last year, the company attracted no less than 200,000 visitors, partly due to an innovative scale proposal for dealing with a fire in an underground car park. They demonstrated how their ventilation systems contribute to the safe evacuation of anyone in the car park.

Did you know that you can find all the ventilation specialists in the same hall at the ISH trade fair now? If this is what you're interested in, just head straight to hall 8 next year.

Fun bonus

After 2 intense days at the trade fair, it's time to wet our whistles. Therefore, SIG Air Handling is organising a Belgian Beer Tasting on Wednesday, 13 March, during which visitors will be introduced to the De Leite Brewery (Ruddervoorde) range.

Would you like to buy tickets for the ISH trade fair? Then please visit this [website](#).

About SIG Air Handling

SIG Air Handling is a leading supplier of products and systems for Heating, Ventilation and Air Conditioning (HVAC). The company is active in 12 countries in Europe and has 100 distribution outlets. SIG Air Handling offers its customers optimum service in the field of distribution. Furthermore, the group continues to focus on the provision of consultation and project solutions for ventilation in the construction industry. The company stands for the highest product quality, excellent logistics, technical expertise and a customer-oriented, problem-solving approach. SIG Air Handling has a pan-European team based in Zaventem. Annual turnover is approximately €265 million, and the company employs about a thousand people.

About SIG plc

SIG plc, or Sheffield Insulation Group, founded in 1957, is the European leader in specialised solutions for the construction industry. The Group has a strong position in four main product areas: Exteriors, Interiors, Insulation and Air Handling. SIG plc markets and distributes its products and services from 700 distribution outlets spread over 15 countries in Europe and the Middle East. SIG plc is a FTSE 250 company listed on the London stock exchange. Annual turnover is €2.9 billion, and the company employs about 10,000 people.
